UNIT 3 · STANDARD 6.AT.3

Compare Ratio Relationships

Lesson 3-5

Name: _____ **Date:** _____ **Class:** _____

My Notes

Level 2 Standard

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can compare ratios by finding unit rates or using equivalent ratios.

Language Objective: I can explain my comparison using the words unit rate, equivalent ratio, compare, and common denominator.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Unit rate · **Equivalent ratio** · **Compare** · **Simplify** · **Common denominator** · **Common multiple** · **Least common multiple** · **Benchmark**

1. A rate that tells the amount for exactly one unit, like 5 miles per 1 hour, is a _____.

2. Two ratios that make the same comparison are _____ _____.

3. To decide which ratio is greater or if they are equal is to _____ them.

4. Writing a ratio with smaller numbers that compares the same way, like 6:9 = 2:3, is to _____ it.

5. A denominator shared by two fractions so they can be compared is a _____.

6. A number that is a multiple of both terms is a _____.

7. The smallest multiple two numbers share is the _____.

8. A shared amount used to compare two ratios is a _____.

Write About the Math

Two pizza shops are running deals. Mario's Pizza sells 2 large pizzas for $18. Sal's Pizza sells 3 large pizzas for $25. A school needs to buy pizza for a class party and wants to get the best deal per pizza?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **Unit rate** *Tasa unitaria*
- ☐ **Equivalent ratio** *Razón equivalente*
- ☐ **Compare** *Comparar*
- ☐ **Simplify** *Simplificar*
- ☐ **Common denominator** *Denominador común*

Model: *When both ratios share 35 oz of milk, you only have to compare the cocoa amounts.* — Students explain that equal milk (35 oz) makes the comparison fair, so 21 tbsp > 20 tbsp means Chef Reyes is more chocolatey.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **Mario's costs ___ per pizza and Sal's costs about ___ per pizza, so the better deal is ___.**
- **My answer is ___ because ___.**
  Mi respuesta es ___ porque ___.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ___.**
  Mi afirmación es ___.
- **My evidence is ___, so ___.**
  Mi evidencia es ___, entonces ___.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.
