UNIT 6 · STANDARD 6.AT.7

The Distributive Property

Lesson 6-14 · Teacher Copy

Name: _____ **Date:** _____ **Class:** _____

My Notes

Level 1 Support

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can use the distributive property to expand and factor expressions.

Language Objective: I can explain my steps using the words distributive property, factor, expand, and equivalent.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

The Distributive Property · Distributive Property · Factor · Expand · Equivalent · Coefficient · Like terms

1 a(b + c) = ab + _____ — the factor reaches _____ term.

2 The rule that a(b + c) = ab + ac is the _____ .

3. To rewrite a sum as a product, like $3x + 12 = 3(x + 4)$, is to _____ .

4. To multiply out a product over a sum, like $3(x + 4) = 3x + 12$, is to _____ .

5. Two expressions that always have the same value are _____ .

6. A number multiplied by a variable is a _____ .

7. Terms with the same variable part are _____ .

Write About the Math

Use the distributive property to find the total cost. Which way of calculating is easier for you?
Usa la propiedad distributiva para hallar el costo total. ¿Qué manera de calcular te resulta más fácil?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **The Distributive Property** — *La propiedad distributiva*
- ☐ **Distributive Property** — *Propiedad distributiva*
- ☐ **Factor** — *Factor*
- ☐ **Expand** — *Desarrollar*
- ☐ **Equivalent** — *Equivalente*

Model: *The distributive property multiplies the 3 by each item, giving the same total.* — Students explain the 3 distributes to both the ticket and the snack ($3 \times 15 + 3 \times 5 = 45 + 15 = 60$), matching 3×20, and use the word equivalent.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **8(12 + 9) = 8 × ___ + 8 × ___ = ___ + ___ = ___. I think the ___ form is easier because ___.**
- **My answer is ___ because ___.**
  Mi respuesta es ___ porque ___.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ___.**
  Mi afirmación es ___.
- **My evidence is ___, so ___.**
  Mi evidencia es ___, entonces ___.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** The Distributive Property
2. **Notes 2:** Distributive Property
3. **Notes 3:** Factor
4. **Notes 4:** Expand
5. **Notes 5:** Equivalent
6. **Notes 6:** Coefficient
7. **Notes 7:** Like terms

8. **Watch for this mistake:** *The most common mistake in The Distributive Property is multiplying the outside factor by only the FIRST term inside the parentheses and forgetting the second — for example, writing 3(x + 4) = 3x + 4 instead of 3x + 12. Before you submit, check: did the outside number reach BOTH terms inside the parentheses?*
9. **Try It 1:** B. 10 + 5n — *Distribute the 5 to each term: 5 × 2 + 5 × n = 10 + 5n.*
10. **Try It 2:** A. 4a + 8 — *Distribute the 4 to each term: 4 × a + 4 × 2 = 4a + 8.*
