Review Before Unit 1

Explain your math thinking and check that your answer makes sense.

Name _____ **Date** _____

Tonight's spark

A store sign says 3 large cereal boxes cost the same as 2 jumbo boxes. A large box is 8 inches by 3 inches by 10 inches. A jumbo box is 10 inches by 4 inches by 10 inches. Which deal holds more cereal?

Make a guess first: do 3 large boxes hold more than 2 jumbo boxes?

Try it

Work it out on paper. Write one answer on each line.

1. **A tray has 7 rows with about 6 cookies in each row. About how many cookies are on the tray?**

   A. 13 **B.** 42 **C.** 76 **D.** 49

   My answer _____

2. **What is 2/3 of 18?**

   A. 6 **B.** 16 **C.** 36 **D.** 12

   My answer _____

3. **Five pens cost $0.80 each. What is the total cost?**

   A. $4.00 **B.** $0.16 **C.** $5.80 **D.** $40.00

   My answer _____

4. **A box is 4 in by 3 in by 5 in. What is its volume?**

   A. 12 cubic inches **B.** 60 square inches **C.** 60 cubic inches **D.** 13 cubic inches

   My answer _____

5 **A table shows the rule 'multiply by 4': 1 → 4, 2 → 8, 3 → 12. What is the output for 9?**

A. 13 **B.** 36 **C.** 94 **D.** 32

My answer _____

6 **Four tickets cost $10.00 altogether. All the tickets cost the same. What does one ticket cost?**

A. $40.00 **B.** $6.00 **C.** $2.50

My answer _____

Talk about it

Which idea did you pick, and how do you know your answer is reasonable?

Home mission

Find a cereal box and a snack box. Measure each one in whole inches: length, width and height. Multiply the three numbers for each. Which box holds more? Ask your student to say it as an argument, with numbers and cubic inches.

If we get stuck, ask

- What is this problem actually asking for — an estimate, a part of something, a volume, or a rule?
- What can we count for sure? Let's start there.
- Could you draw it, or put it in a table?

Do it on a screen

Scan or type the link. Same lesson, with hints.
