Math is Everywhere

Find math in jobs, hobbies, and your own home.

Name _____ **Date** _____

Tonight's spark

Before a restaurant opens, the chef plans the menu and orders the food. Before one dish is cooked, how many different math jobs does the chef do?

Guess first: two math jobs, or more?

Try it

Finish each sentence in your own words.

1. **A ___ is a profession because ___.**

   My words _____

2. **Before I order, I count my inventory of ___.**

   My words _____

3. **One portion of ___ is ___.**

   My words _____

4. **The area of ___ tells me ___.**

   My words _____

5. **I find the volume of ___ to know how much ___.**

   My words _____

Talk about it

What did someone in our home count or measure today?

Home mission

Pick one meal your family eats. Ask your student to be the chef. How many people will eat? How much of each food does one person need? Talk about how you would multiply to plan the whole meal.

If we get stuck, ask

- Where did you see numbers being used today?
- How much is needed for one person?
- What job uses the math we did this year?

Do it on a screen

Scan or type the link. Same lesson, with hints.
