Understand Percent

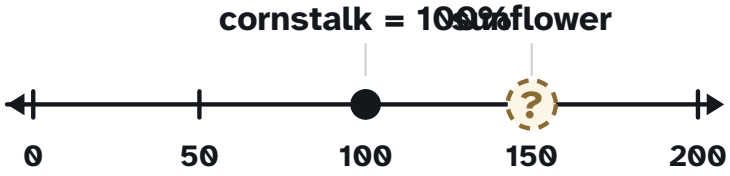
Understand that a percent greater than 100% means more than one whole.

Name _____ **Date** _____

Tonight's spark

A cornstalk in the school garden counts as 100% of its own height. The sunflower next to it is 1.5 times as tall. What percent of the cornstalk's height is the sunflower?

Make a guess first: is it more than 100%, or less?



percent of the cornstalk's height

Our class model: one whole is 100%

Try it

Work it out on paper. Write one answer on each line.

1 **Write 1.5 as a percent.**

A. 15% **B.** 150% **C.** 1.5% **D.** 105%

My answer _____

2 **Which percent is MORE than one whole?**

A. 99% **B.** 100% **C.** 125% **D.** 75%

My answer _____

3 **What percent is two whole amounts?**

A. 20% **B.** 102% **C.** 200% **D.** 2%

My answer _____

4 **A reading goal is 10 pages. Sam reads 25 pages. What percent of the goal did Sam read?**

A. 25% **B.** 250% **C.** 15% **D.** 2.5%

My answer _____

5 **300% of an amount is how many wholes?**

A. 3 **B.** 30 **C.** 0.3 **D.** 300

My answer _____

6 **What is 200% of 15?**

A. 7.5 **B.** 30 **C.** 200 **D.** 15

My answer _____

Talk about it

Which amount is the goal (100%)? Is the new amount more or less than that whole?

Home mission

Hold up one glass of water and call it 100%. Ask your student: if I pour 1 and a half glasses, what percent is that? What about 2 glasses? 2 and a half?

If we get stuck, ask

- What is the whole here? What counts as 100%?
- Is the amount more than one whole or less?
- How many full bars would you draw, and how much of another?

Do it on a screen

Scan or type the link. Same lesson, with hints.
