Relate Fractions, Decimals, and Percentages

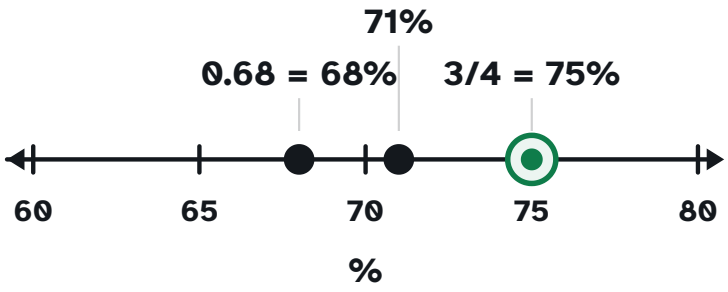
Put fractions, decimals, and percents in order by writing them all in one form.

Name _____ **Date** _____

Tonight's spark

Three players tell how they did on free throws. Dee made 0.68 of her shots. Eli made 71%. Fay made 3/4. Who shot best?

Make a guess first: which of the three numbers looks greatest?



Our class model: one common form

Try it

Work it out on paper. Write one answer on each line.

1 **Before ordering 0.5, 1/4, and 30%, what should you do first?**

A. Order them by how they look **B.** Rewrite them all in one form, like percent
C. Add them together **D.** Pick the one with the most digits

My answer _____

2 **Write 0.5 as a percent.**

A. 5% **B.** 0.5% **C.** 15% **D.** 50%

My answer _____

3 **Write 4/5 as a percent.**

A. 80% **B.** 45% **C.** 4.5% **D.** 20%

My answer _____

4 **Which is greater: 0.4 or 35%?**

A. 35%, because 35 is greater than 4 **B.** They are equal

C. 0.4, because 0.4 is 40% and 40% is greater than 35%

My answer _____

5 **Order 25%, 0.2, and 1/2 from least to greatest.**

A. 25%, 0.2, 1/2 **B.** 0.2, 25%, 1/2 **C.** 1/2, 25%, 0.2 **D.** 0.2, 1/2, 25%

My answer _____

6 **Order 0.7, 3/5, and 65% from least to greatest.**

A. 0.7, 3/5, 65% **B.** 65%, 3/5, 0.7 **C.** 3/5, 0.7, 65% **D.** 3/5, 65%, 0.7

My answer _____

Talk about it

What common form did you pick, and what order did you get?

Home mission

Pretend three players have these records: 0.8, 7/10, and 75%. Ask your student which form to use for all three. Who has the best record?

If we get stuck, ask

- Which one form will you write all of them in?
- What does this fraction become out of 100?
- Are they all in the same form yet? Then compare.

Do it on a screen

Scan or type the link. Same lesson, with hints.
