Division Expressions with Fractions and Whole Numbers

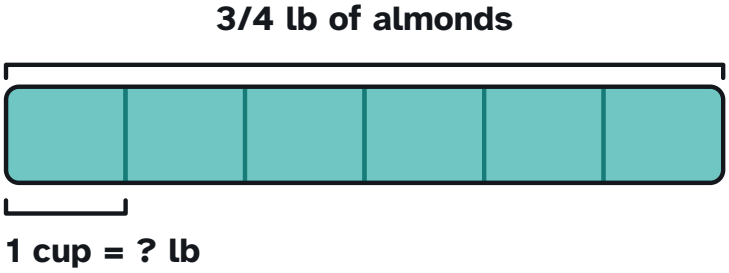
Divide a fraction by a whole number to split it into equal shares.

Name _____ **Date** _____

Tonight's spark

A snack bar has a 3/4-pound bag of almonds. A coach splits it evenly into 6 snack cups for the team. How much goes in each cup?

Make a guess first: will each cup hold more than 3/4 pound, or less?



Our class model: splitting into equal shares

Try it

Work it out on paper. Write one answer on each line.

1 **Which fraction is the same as the whole number 6?**

A. 1/6 **B.** 6/1 **C.** 6/6 **D.** 1/1

My answer _____

2 **What is the reciprocal of 6?**

A. 6 **B.** –6 **C.** 6/6 **D.** 1/6

My answer _____

3 **Dividing 2/3 by 5 is the same as multiplying 2/3 by what?**

A. 1/5 **B.** 5 **C.** 3/2 **D.** 2/5

My answer _____

4 **Use Keep, Change, Flip on 2/5 ÷ 3. Which is the new problem?**

A. 5/2 × 3 **B.** 2/5 ÷ 1/3 **C.** 2/5 × 1/3 **D.** 2/5 × 3

My answer _____

5 **What is 4/5 ÷ 2?**

A. 8/5 **B.** 2/5 **C.** 4/7 **D.** 5/8

My answer _____

6 **2/3 of a gallon of paint is split evenly among 4 jars. How much paint is in each jar?**

A. 8/3 **B.** 2/7 **C.** 3/2 **D.** 1/6

My answer _____

Talk about it

Is one share more or less than the 3/4 you started with, and why?

Home mission

Fold a sheet of paper in half, then in half again, to make fourths. Shade 3 fourths. Pretend it is the bag of almonds. Fold each fourth in half. What fraction of the whole sheet is one cup?

If we get stuck, ask

- How many equal shares are we splitting this into?
- What is the reciprocal of that whole number?
- Should each share be bigger or smaller than what we started with?

Do it on a screen

Scan or type the link. Same lesson, with hints.
