Fraction Division Problem Solving

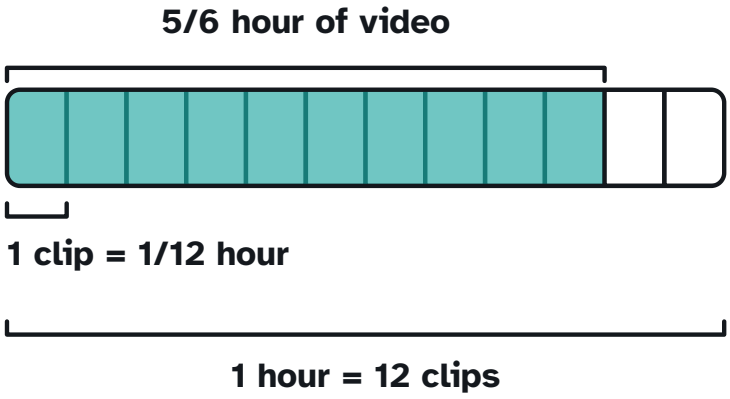
Decide which number goes first in a fraction division word problem.

Name _____ **Date** _____

Tonight's spark

A coach has 5/6 hour of game video. Each highlight clip is 1/12 hour long. How many clips can she cut?

Guess first: will it be more than 5 clips, or fewer?



Our class model: say the total, then the group

Try it

Work it out on paper. Write one answer on each line.

1. **A box holds 5/8 pound of nails. Each bag gets 1/16 pound. In this problem, which fraction is the size of one group?**

   A. 5/8 **B.** 1/16 **C.** 5/16

   My answer _____

2. **Which equation matches "How many 1/4-cup scoops are in 3/4 cup of flour?"**

   A. 3/4 ÷ 1/4 **B.** 1/4 ÷ 3/4 **C.** 3/4 × 1/4 **D.** 3/4 – 1/4

   My answer _____

3 **Find 3/4 ÷ 3/8.**

A. 9/32 **B.** 1/2 **C.** 1 1/8 **D.** 2

My answer _____

4 **Find 9/10 ÷ 3/20.**

A. 1/6 **B.** 6 **C.** 3/4 **D.** 27/200

My answer _____

5 **Without solving, which answer makes sense for "How many 1/6-pound slices can be cut from 5/6 pound of cheese?"**

A. 5/36 of a slice **B.** 1/5 of a slice **C.** 5 slices

My answer _____

Talk about it

Which number is the total, and which is the size of one group? Does your answer make sense for a "how many" question?

Home mission

Find a cup and a small spoon. Say, "The total is the cup. One group is the spoon." Guess how many spoonfuls fill the cup. Then spoon rice into the cup and count. Which number went first?

If we get stuck, ask

- What is the total amount, and what is one group?
- Which one goes first in the division?
- Does your answer make sense as a number of groups?

Do it on a screen

Scan or type the link. Same lesson, with hints.
