UNIT 2 • STANDARD 6.NOS.1

Divide Mixed Numbers

Lesson 2-4 • Teacher Copy

Name: _____ **Date:** _____ **Class:** _____

TODAY'S OBJECTIVES

Content Objective: I can divide mixed numbers by first changing them to improper fractions.

Language Objective: I can explain my steps using the words **mixed number**, **improper fraction**, **convert**, **reciprocal**, and **simplify**.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Mixed Number

Improper Fraction

Convert

Simplify

Reciprocal

Tap any word to see what it means and a picture.

- 1 A number with a whole number and a fraction, like $2\frac{1}{3}$, is a

- 2 A fraction whose numerator is greater than or equal to its denominator, like $\frac{7}{3}$, is an

- 3 Changing a mixed number into an improper fraction is to it.

- 4 Writing a fraction in its smallest equal form is to it.

- 5 To divide by a fraction, I multiply by its .

Reflect — Exit Ticket

What is $2\frac{2}{3} \div \frac{2}{3}$?

- A. 4
- B. $\frac{2}{3}$
- C. $\frac{8}{3}$
- D. $1\frac{7}{9}$

Your answer:

Answer Key & Teacher Guide

1. **Notes 1:** Mixed Number
2. **Notes 2:** Improper Fraction
3. **Notes 3:** Convert
4. **Notes 4:** Simplify
5. **Notes 5:** Reciprocal
6. **Watch for this mistake:** *A common mistake in Divide Mixed Numbers is skipping the key idea: "Always convert a mixed number to an improper fraction first, then divide using Keep, Change, Flip." — always check your work against this rule before you submit.*
7. **Try It 1:** A. $2 — 3 \div 1 \frac{1}{2} = 3 \div \frac{3}{2} = 3 \times \frac{2}{3} = \frac{6}{3} = 2$ sections.
8. **Try It 2:** A. $3 — 7 \frac{1}{2} = \frac{15}{2}$ and $2 \frac{1}{2} = \frac{5}{2}$. So $\frac{15}{2} \div \frac{5}{2} = \frac{15}{2} \times \frac{2}{5} = \frac{30}{10} = 3$ doorways.
9. **Exit Ticket:** A. $4 — 2 \frac{2}{3} = \frac{8}{3}$. Then $\frac{8}{3} \div \frac{2}{3} = \frac{8}{3} \times \frac{3}{2} = \frac{24}{6} = 4$.
