UNIT 5 · STANDARD 6.GR.1

Area of Composite Figures

Lesson 5-5 · Teacher Copy

Name: _____ **Date:** _____ **Class:** _____

TODAY'S OBJECTIVES

Content Objective: I can find the area of a composite figure by adding or subtracting the areas of basic shapes.

Language Objective: I can explain my steps using the words composite figure, decompose, add, and subtract.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

Composite Figure

Decompose

Add

Subtract

Formula

Tap any word to see what it means and a picture.

1

A shape made of two or more basic shapes combined is a .

2

To break a composite figure into basic shapes is to it.

3

To find the total area of separate parts, I their areas.

4

To find the area of a shape with a piece removed, I the missing part's area.

5

A math rule written with symbols is a .

Reflect — Exit Ticket

A composite figure is made of a 9 ft x 7 ft rectangle and a 3 ft x 4 ft rectangle joined together. What is the total area?

- A. 75 sq ft
- B. 63 sq ft
- C. 12 sq ft
- D. 75 ft

Your answer:

Answer Key & Teacher Guide

1. **Notes 1:** Composite Figure
2. **Notes 2:** Decompose
3. **Notes 3:** Add
4. **Notes 4:** Subtract
5. **Notes 5:** Formula
6. **Watch for this mistake:** *A common mistake in Area of Composite Figures is skipping the key idea: "Break the figure into simple shapes. ADD the areas when shapes are joined; SUBTRACT when a piece is cut out." — always check your work against this rule before you submit.*
7. **Try It 1:** A. 75 sq ft — *First rectangle = $9 \times 6 = 54$ sq ft. Second rectangle = $7 \times 3 = 21$ sq ft. Joined L-shape, so add: $54 + 21 = 75$ sq ft.*
8. **Try It 2:** A. 172 sq ft — *Large rectangle = $16 \times 12 = 192$ sq ft. Cutout closet = $5 \times 4 = 20$ sq ft. A piece is removed, so subtract: $192 - 20 = 172$ sq ft.*
9. **Exit Ticket:** A. 75 sq ft — *Area 1 = $9 \times 7 = 63$ sq ft. Area 2 = $3 \times 4 = 12$ sq ft. Total = $63 + 12 = 75$ square feet.*
