Class:

TODAY'S OBJECTIVES

Content Objective: I can choose the best measure of center for a data set based on its shape.

Language Objective: I can explain my choice using the words mean, median, outlier, and skewed.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Mean

Median

Outlier

Skewed

Data distribution

Variability

Tap any word to see what it means and a picture.

1 The average of a data set is the .

2 The middle value when data is in order, often best when there is an outlier, is the .

3 A value far from the rest of the data, which can pull the mean, is an .

4 Data that is bunched on one side with a tail on the other is .

5 The way data values are spread out is the .

6 How much the data values differ is the .

Reflect — Exit Ticket

Data set: 15, 18, 16, 17, 15, 72. Which measure of center best represents the data?

- A. Median, because 72 is an outlier
- B. Mean, because it uses all values
- C. Mean, because it is always best
- D. Neither works for this data

Your answer:
