UNIT 8 • STANDARD 6.DS.5

Display Data: Histograms

Lesson 8-6 • Teacher Copy

Name: _____ **Date:** _____ **Class:** _____

TODAY'S OBJECTIVES

Content Objective: I can make and read a histogram to display data in intervals.

Language Objective: I can explain my histogram using the words histogram, frequency, interval, and distribution.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Histogram

Frequency

Interval

Distribution

Variability

Tap any word to see what it means and a picture.

1

A bar graph that shows how often data falls into equal intervals is a

2

How many data values fall in an interval is the .

3

An equal-sized range of values used to group data is an .

4

The overall pattern of how data is spread out is the .

5

How much the data values differ is the .

Reflect — Exit Ticket

A histogram of player heights shows: 60–63 in: 2, 64–67 in: 7, 68–71 in: 9, 72–75 in: 4. Which interval has the most players?

- A. 68–71 inches
- B. 64–67 inches
- C. 72–75 inches
- D. 60–63 inches

Your answer:

Answer Key & Teacher Guide

1. **Notes 1:** Histogram
2. **Notes 2:** Frequency
3. **Notes 3:** Interval
4. **Notes 4:** Distribution
5. **Notes 5:** Variability
6. **Watch for this mistake:** *A common mistake in Display Data: Histograms is skipping the key idea: "Each bar's height shows how many data values land inside that interval." — always check your work against this rule before you submit.*
7. **Try It 1:** A. 10–19 with 9 players — *The 10–19 interval has the greatest frequency (9 players), so its bar is the tallest.*
8. **Try It 2:** A. 16 — *Add every bar's frequency: $2 + 8 + 5 + 1 = 16$ players total.*
9. **Exit Ticket:** A. 68–71 inches — *The 68–71 inch interval has the highest frequency of 9 players.*
