4. **Notes 4:** Quadrant
5. **Notes 5:** Reflection
6. **Notes 6:** Integer
7. **Watch for this mistake:** *A common mistake in Graph on the Coordinate Plane is skipping the key idea: "Always start at the origin (0, 0), move right/left first, then up/down." — always check your work against this rule before you submit.*
8. **Try It 1:** A. Move 4 units to the right along the x-axis — *The first number in (x, y) is the x-coordinate, so 4 means move 4 units to the right along the x-axis before moving up.*
9. **Try It 2:** A. (3, 8) — *Across (3) is the x-coordinate and up (8) is the y-coordinate, so the Coconut Grove is at (3, 8).*
10. **Exit Ticket:** A. (6, 3) — *Right 6 = x-coordinate of 6, Up 3 = y-coordinate of 3. The ordered pair is (6, 3).*
