UNIT 9 • STANDARD 6.NOS.8

Integers and Absolute Value

Lesson 9-2 • Teacher Copy

Name: _____ **Date:** _____ **Class:** _____

TODAY'S OBJECTIVES

Content Objective: I can identify integers and find their absolute value.

Language Objective: I can explain my reasoning using the words integer, positive, negative, absolute value, and opposite.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Integer

Positive

Negative

Absolute value

Opposite

Tap any word to see what it means and a picture.

1 A whole number or its opposite, like -2 , 0 , or 5 , is an .

2 A number greater than zero is .

3 A number less than zero is .

4 The distance of a number from zero, always positive, is its .

5 Two numbers the same distance from zero but on different sides, like 4 and -4 , are

.

Reflect — Exit Ticket

Which integer has an absolute value of 8 and is located to the LEFT of zero on the number line?

- A. 8
- B. -8
- C. 0
- D. -80

Your answer:

Answer Key & Teacher Guide

1. **Notes 1:** Integer
2. **Notes 2:** Positive
3. **Notes 3:** Negative
4. **Notes 4:** Absolute value
5. **Notes 5:** Opposite
6. **Watch for this mistake:** *A common mistake in Integers and Absolute Value is skipping the key idea: "Absolute value tells you the distance from zero, so it is always positive or zero." — always check your work against this rule before you submit.*
7. **Try It 1:** A. -5 degrees F (Ice Cave) — *On a number line, -5 is to the left of -2, so -5 is the smaller (colder) temperature.*
8. **Try It 2:** A. $|-12|$ because $12 > 7$ — $|-12| = 12$ and $|7| = 7$. *Since $12 > 7$, the absolute value of -12 is greater.*
9. **Exit Ticket:** B. -8 — *To the left of zero means negative. The integer -8 has an absolute value of 8 because it is 8 units from zero.*
