UNIT 1 • STANDARD 6.NS.4

Least Common Multiple

Lesson 1-3 • Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

Key Vocabulary

Level 2 Standard

Picture first, then the word, then a plain-language meaning. Say each word out loud.

Multiples of 4: 4, 8, 12, 16, 20 — found by multiplying 4×1 , 4×2 , 4×3 , ...

Multiple

Write the definition:

4: 4 8 12

6: 6 12 18

12

LCM = smallest shared multiple

Multiples of 4: 4, 8, 12, 16, 20, 24. Multiples of 6: 6, 12, 18, 24. First match: 12 → LCM = 12

Least common multiple

Write the definition:

4: 4 8 12

6: 6 12 18

12

LCM = smallest shared multiple

12, 24, and 36 are all common multiples of both 3 and 4

Common multiple

Write the definition:

multiples of 3

Skip count by 6: 6, 12, 18, 24, 30 — each jump adds 6

Skip counting

Write the definition:

$4 = 2 \times 2$, $6 = 2 \times 3$. LCM uses the highest power of each prime: $2^2 \times 3 = 12$

Prime factorization

Write the definition:

Guided Notes

Level 2 Standard

WHAT WE'RE LEARNING TODAY

I can find the least common multiple (LCM) of two numbers by listing or comparing their multiples.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Multiple

Least common multiple

Common multiple

Skip counting

Prime factorization

Tap any word to see what it means and a picture.

1

The product of a number and any whole number is a of that number.

2

— The smallest number that two or more numbers both go into.

3

A multiple that two or more numbers share is a multiple.

4

Counting forward by a number other than 1, like 6, 12, 18, is called

.

5

— Writing a number as prime numbers multiplied together. It helps you find the LCM.

Watch & Try — Worked Examples

See the notes in action: watch one worked all the way through, then try the next with the same steps.

 I do — watch

Follow each step as your teacher solves it.

Problem: What is the LCM of 3 and 5?

- A. 15
- B. 3
- C. 5
- D. 30

Step 1 Multiples of 3: 3, 6, 9, 12, 15, ...

Step 2 Multiples of 5: 5, 10, 15, ...

Step 3 The smallest common multiple is 15.

 **Answer:** A. 15

 Try — put the steps in order

Drag the cards (or use the ▲ ▼ buttons) to put the solution steps in the right order, then press **Check**.

Multiples of 5: 5, 10, 15, ...

The smallest common multiple is 15.

Multiples of 3: 3, 6, 9, 12, 15, ...

 We do — together

Solve this one with your class using the same steps.

Problem: What is the LCM of 6 and 8?

- A. 24
- B. 48
- C. 14
- D. 6

Step 1

Step 2

Step 3

Answer:

 You do — your turn

Now try one on your own. Show every step.

Problem: What is the LCM of 4 and 10?

- A. 20
- B. 40
- C. 10
- D. 2

Show your work:

Try It

Solve on your own. Check the answer key when you are done.

1. Stop 1 — Oxygen Bay: The oxygen scrubber cycles every 4 minutes and the air filter cycles every 6 minutes. They both just ran together. After how many minutes do they next run together?

- A. 12
- B. 10
- C. 24
- D. 6

Show your work:

2. Stop 2 — Docking Ring: A supply pod arrives every 8 minutes and a cargo shuttle arrives every 12 minutes. They just docked together. After how many minutes do they next dock together?

- A. 24
- B. 20
- C. 48
- D. 16

Show your work:

Stretch Your Thinking

Level 2 enrichment

Challenge task — explain your reasoning in full sentences.

Hot dogs come in packs of 8 and buns come in packs of 6. What is the fewest of each you can buy so you have the same number of hot dogs and buns with none left over? Explain how the LCM solves this problem.

Sentence starter: The LCM of 8 and 6 is _____. I need to buy _____ packs of hot dogs and _____ packs of buns to get _____ of each. This works because _____.

Show your work:

Reflect — Exit Ticket

What is the LCM of 9 and 12?

- A. 36
- B. 108
- C. 3
- D. 72

Your answer:

Answer Key & Teacher Guide

1. **Notes 1:** Multiple
2. **Notes 2:** Least common multiple
3. **Notes 3:** Common multiple
4. **Notes 4:** Skip counting
5. **Notes 5:** Prime factorization
6. **We Try (notes):** A. 24 — *Multiples of 6: 6, 12, 18, 24, ... Multiples of 8: 8, 16, 24, ... The smallest common multiple is 24.*
7. **You Try (notes):** A. 20 — *Multiples of 4: 4, 8, 12, 16, 20, ... Multiples of 10: 10, 20, ... The smallest common multiple is 20.*
8. **Try It 1:** A. 12 — *Skip count: multiples of 4 are 4, 8, 12; multiples of 6 are 6, 12. The first shared multiple is $LCM(4, 6) = 12$ minutes.*
9. **Try It 2:** A. 24 — *$LCM(8, 12) = 24$. Multiples of 8: 8, 16, 24; multiples of 12: 12, 24. The first shared multiple is 24 minutes.*
10. **Exit Ticket:** A. 36 — *Multiples of 9: 9, 18, 27, 36, ... Multiples of 12: 12, 24, 36, ... The smallest common multiple is 36.*
