UNIT 10 • STANDARD MPP.3

Math is Mine

Lesson 10-6 • Teacher Copy

Name: _____

Date: _____

Class: _____

TODAY'S OBJECTIVES

Content Objective: I can look back at my answers from Lesson 1-1, describe how my math biography has changed this year, and recognize ways we are all doers of math.

Language Objective: I can compare my beginning-of-year and end-of-year math stories using the words then, now, changed, and grown.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

math biography

reflect

growth

confidence

community

Tap any word to see what it means and a picture.

Level 3: try the blanks from memory first, then check the bank.

1

— The story of your relationship with math — and how it has changed over time.

2

— To look back at what you did, felt, and learned, and think about what it means.

3

— The change between what you could do before and what you can do now.

4

— Trusting yourself to try a problem, even when the first attempt might fail.

5

— The people and places around you — where math shows up outside the classroom.

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

COMPARE

How does your classmate's end-of-school-year math story compare to your story?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

- ☐ **math biography** — The story of your relationship with math — and how it has changed over time.

biografía matemática — La historia de tu relación con las matemáticas y cómo ha cambiado con el tiempo.

- ☐ **reflect** — To look back at what you did, felt, and learned, and think about what it means.

reflexionar — Mirar atrás a lo que hiciste, sentiste y aprendiste, y pensar en lo que significa.

- ☐ **growth** — The change between what you could do before and what you can do now.

crecimiento — El cambio entre lo que podías hacer antes y lo que puedes hacer ahora.

- ☐ **confidence** — Trusting yourself to try a problem, even when the first attempt might fail.

confianza — Confiar en ti mismo para intentar un problema, aunque el primer intento pueda fallar.

- ☐ **community** — The people and places around you — where math shows up outside the classroom.

comunidad — Las personas y los lugares que te rodean, donde las matemáticas aparecen fuera del aula.

Say it first: Say your idea to a partner or quietly to yourself before you write.

Di tu idea a un compañero o en voz baja antes de escribir.

Describe how your math story has ____ this year, ask a ____ about their story, and then ____ the two to see how they are alike and different.

Di tu respuesta primero: Mi respuesta es ____ porque ____.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: $80 \text{ riders per turn} \times 6 \text{ turns an hour} = 480 \text{ riders an hour}$, using a rate — a tool this year's math added.

Evidence: A strong answer multiplies $80 \times 6 = 480$ correctly and names 'rate' as the new tool. A weak answer gives 480 with no explanation of what changed since September.

Reasoning: This evidence connects the definition of math biography to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **Describe how your math story has ____ this year, ask a ____ about their story, and then ____ the two to see how they are alike and different.**
- **My answer is ____.**

Mi respuesta es ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
- **I know because ____.**

Mi afirmación es ____.

Lo sé porque ____.

- **So ____.**

Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
Mi afirmación es ____.
- **My math evidence is ____.**
Mi evidencia matemática es ____.
- **This proves ____ because ____.**
Esto demuestra ____ porque ____.

4. Check Your Explanation

- ☐ I answered the question.
Respondí la pregunta.
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.
Usé evidencia matemática: números, una ecuación, un modelo o una comparación.
- ☐ I explained how the evidence proves my answer.
Explicué cómo la evidencia demuestra mi respuesta.
- ☐ I used at least two math words.
Usé por lo menos dos palabras matemáticas.
- ☐ I reread complete sentences and punctuation.
Volví a leer mis oraciones completas y la puntuación.

Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

Answer Key & Teacher Guide

1. **Notes 1:** math biography
2. **Notes 2:** reflect
3. **Notes 3:** growth
4. **Notes 4:** confidence
5. **Notes 5:** community
6. **Watch for this mistake:** *Treating your math story as finished — writing the same answers you wrote in Lesson 1-1 instead of looking for what actually changed. The story grows and evolves; a retrospective that copies September has missed the point.*
7. **Try It 1:**
8. **Try It 2:**
