

Relate Fractions, Decimals, and Percentages

Lesson 4-2

Name: Type your name

Date: Today's date

Class: Class period

My Notes

Level 1 Support

TODAY'S OBJECTIVES

Content Objective: I can write equivalent fractions, decimals, and percents for the same value.

Language Objective: I can explain my conversions using the words percent, decimal, equivalent, and benchmark.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

1

— Three equivalent ways to name the same part of a whole.

2

A ratio that compares a number to 100, written with a % sign, is a

3

A number that uses a point to show parts of a whole is a

4

— Having the same value, just written a different way.

- 5 A common, easy-to-remember value like 50% or $\frac{1}{4}$ used for comparing is a

.

- 6 An amount taken off a price, often given as a percent, is a

.

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

Who is correct, and how much would the game cost on sale?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

☐ **Fractions, Decimals, and Percents**

— Three equivalent ways to name the same part of a whole.

Fracciones, decimales y porcentajes — Tres maneras equivalentes de nombrar la misma parte de un todo.

☐ **Percent** — A way to compare a number to 100, shown with the % sign.

Porcentaje — Una manera de comparar un número con 100, con el signo %.

☐ **Decimal** — A number with a dot, like 0.5, that shows a part less than one.

Decimal — Un número con un punto, como 0.5, que muestra una parte menor que uno.

☐ **Equivalent** — Having the same value, just written a different way.

Equivalente — Tener el mismo valor, escrito de otra forma.

☐ **Benchmark** — A familiar number you use to guess, like 50% or $\frac{1}{2}$.

Referencia — Un número conocido que usas para estimar, como 50% o $\frac{1}{2}$.

Say it first: Say your idea to a partner or quietly to yourself before you write.

Di tu idea a un compañero o en voz baja antes de escribir.

The friend who said ____% is correct because $\frac{3}{5} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}\%$. The sale price is \$____.

Di tu respuesta primero: Mi respuesta es ____ porque ____.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: $\frac{3}{4}$, 0.75, and 75% all name the same score.

Evidence: Students give $\frac{3}{4} = 0.75 = 75\%$ and recognize these are three forms of one value, not three different scores.

Reasoning: This evidence connects the definition of percent to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- The friend who said ____% is correct because $\frac{3}{5} = \frac{\quad}{\quad} = \frac{\quad}{\quad}\%$. The sale price is \$____.
- My answer is ____.

Mi respuesta es ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- My claim is ____.
- I know because ____.

Mi afirmación es ____.

Lo sé porque ____.

- So ____.

Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
Mi afirmación es ____.
- **My math evidence is ____.**
Mi evidencia matemática es ____.
- **This proves ____ because ____.**
Esto demuestra ____ porque ____.

4. Check Your Explanation

- ☐ I answered the question.
Respondí la pregunta.
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.
Usé evidencia matemática: números, una ecuación, un modelo o una comparación.
- ☐ I explained how the evidence proves my answer.
Explicué cómo la evidencia demuestra mi respuesta.
- ☐ I used at least two math words.
Usé por lo menos dos palabras matemáticas.
- ☐ I reread complete sentences and punctuation.
Volví a leer mis oraciones completas y la puntuación.
