

Lesson 3.5 Explain Your Thinking

Session 1 · Comparing Ratios with Common Terms

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
common multiple	múltiplo común
least common multiple	mínimo común múltiplo
stronger / weaker	más fuerte / más débil

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

For the same ____ cups of concentrate, ____ uses ____ water, so ____.

3 · Choose a connected sentence

Because: My conclusion follows because ____.

But: Compares unequal reference amounts or confuses the water with the total mixture. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____, so ____.

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.

GRADE 6 MATHEMATICS | STUDENT SUPPORT

Session 2 · Comparing Rates with Benchmarks

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
benchmark	punto de referencia
rate	tasa
unit rate	tasa unitaria

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

I compared ____ minutes for both, which gives ____ and ____, so ____.

3 · Choose a connected sentence

Because: My conclusion follows because ____.

But: Selects the larger produced quantity without considering elapsed time. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____, so ____.

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.
