

Math is In My World

Lesson 1-3

Name:

Date:

Class:

My Notes

Level 1 Support

TODAY'S OBJECTIVES

Content Objective: I can represent a real-world situation with a tape diagram or table and use decimal operations to solve it.

Language Objective: I can describe my tool using the words tape diagram, table, and this represents ____ .

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

representation

tape diagram

tool

ordered pair

round trip

Tap any word to see what it means and a picture.

1

— A picture, diagram, table, or equation that shows the mathematics in a situation.

2

— A rectangle cut into equal parts that helps you visualize how a total breaks apart.

3

— Anything you choose to help you see relationships and solve a problem — a table, a diagram, a graph.

4

— Two numbers that go together, like a time and a number of trips, that you can plot as a point.

5

— A complete journey from the start, to the destination, and back to the start.

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

What tool can you use to represent the relationship between time and round trips, and how does it answer the question?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

- ☐ **representation** — A picture, diagram, table, or equation that shows the mathematics in a situation.

representación — Un dibujo, diagrama, tabla o ecuación que muestra las matemáticas de una situación.

- ☐ **tape diagram** — A rectangle cut into equal parts that helps you visualize how a total breaks apart.

diagrama de cintas — Un rectángulo dividido en partes iguales que te ayuda a visualizar cómo se separa un total.

- ☐ **tool** — Anything you choose to help you see relationships and solve a problem — a table, a diagram, a graph.

herramienta — Cualquier cosa que eliges para ver relaciones y resolver un problema: una tabla, un diagrama, una gráfica.

- ☐ **ordered pair** — Two numbers that go together, like a time and a number of trips, that you can plot as a point.

par ordenado — Dos números que van juntos, como un tiempo y un número de viajes, que puedes graficar como un punto.

- ☐ **round trip** — A complete journey from the start, to the destination, and back to the start.

viaje de ida y vuelta — Un recorrido completo desde el inicio hasta el destino y de regreso al inicio.

Say it first: Say your idea to a partner or quietly to yourself before you write.

Di tu idea a un compañero o en voz baja antes de escribir.

Name the tool you would use to show the relationship — a ____ of values — then name the two quantities in the problem: ____ and ____ .

Di tu respuesta primero: Mi respuesta es ____ porque ____ .

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: Moving 4,000 passengers in rides of 80 each requires dividing 4,000 by 80.

Evidence: A strong answer identifies division because you're splitting a total into equal-sized groups (rides of 80). A weak answer just says 'divide' without connecting it to splitting the total passengers into groups.

Reasoning: This evidence connects the definition of representation to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **Name the tool you would use to show the relationship — a ____ of values — then name the two quantities in the problem: ____ and ____ .**
- **My answer is ____.**

Mi respuesta es ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
- **I know because ____.**

Mi afirmación es ____.

Lo sé porque ____.

- **So ____.**

Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
Mi afirmación es ____.
 - **My math evidence is ____.**
Mi evidencia matemática es ____.
 - **This proves ____ because ____.**
Esto demuestra ____ porque ____.
-
-
-

4. Check Your Explanation

- ☐ I answered the question.
Respondí la pregunta.
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.
Usé evidencia matemática: números, una ecuación, un modelo o una comparación.
- ☐ I explained how the evidence proves my answer.
Explicué cómo la evidencia demuestra mi respuesta.
- ☐ I used at least two math words.
Usé por lo menos dos palabras matemáticas.
- ☐ I reread complete sentences and punctuation.
Volví a leer mis oraciones completas y la puntuación.
