

Math is Beauty

Lesson 10-2

Name:

Date:

Class:

My Notes

Level 3 Enrichment

TODAY'S OBJECTIVES

Content Objective: I can use **bilateral symmetry** to describe structure in nature and in human creations.

Language Objective: I can describe a symmetric design using the words **mirror image**, **line of symmetry**, and **balance**.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

symmetric

mirror image

bilateral symmetry

line of symmetry

balance

Tap any word to see what it means and a picture.

Level 3: try the blanks from memory first, then check the bank.

1

— Having two halves that match — one side is a mirror image of the other.

2

— A copy of a shape flipped across a line, like a reflection in a mirror.

3

— Reflective symmetry in plants and animals — the two sides of the body mirror each other.

4

— The line you can draw through a figure so each side is a reflection of the other.

5

— An even, steady arrangement — neither side feels heavier than the other.

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

How do you respond to your friend?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

- ☐ **symmetric** — Having two halves that match — one side is a mirror image of the other.

simétrico — Que tiene dos mitades que coinciden: un lado es la imagen reflejada del otro.

- ☐ **mirror image** — A copy of a shape flipped across a line, like a reflection in a mirror.

imagen reflejada — Una copia de una figura volteada sobre una línea, como un reflejo en un espejo.

- ☐ **bilateral symmetry** — Reflective symmetry in plants and animals — the two sides of the body mirror each other.

simetría bilateral — La simetría reflectiva en plantas y animales: los dos lados del cuerpo se reflejan entre sí.

- ☐ **line of symmetry** — The line you can draw through a figure so each side is a reflection of the other.

eje de simetría — La línea que puedes trazar por una figura de modo que cada lado sea el reflejo del otro.

- ☐ **balance** — An even, steady arrangement — neither side feels heavier than the other.

equilibrio — Una disposición pareja y estable: ningún lado se siente más pesado que el otro.

Say it first: Say your idea to a partner or quietly to yourself before you write.

Di tu idea a un compañero o en voz baja antes de escribir.

To settle the disagreement, draw a ____ through the center of each flower and check whether one side is a ____ of the other. If the test works for both, then ____ flowers have bilateral symmetry.

Di tu respuesta primero: Mi respuesta es ____ porque ____.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: A figure is symmetric only if there is a specific line where one side is a mirror image of the other.

Evidence: A strong answer explains the line gives you something to compare the two sides across — without it, you can't test whether the sides actually match. A weak answer just says 'it looks the same.'

Reasoning: This evidence connects the definition of symmetric to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- To settle the disagreement, draw a ____ through the center of each flower and check whether one side is a ____ of the other. If the test works for both, then ____ flowers have bilateral symmetry.
- My answer is ____.

Mi respuesta es ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- My claim is ____.
Mi afirmación es ____.
- I know because ____.
Lo sé porque ____.
- So ____.
Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
Mi afirmación es ____.
 - **My math evidence is ____.**
Mi evidencia matemática es ____.
 - **This proves ____ because ____.**
Esto demuestra ____ porque ____.
-
-
-

4. Check Your Explanation

- ☐ I answered the question.
Respondí la pregunta.
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.
Usé evidencia matemática: números, una ecuación, un modelo o una comparación.
- ☐ I explained how the evidence proves my answer.
Explicué cómo la evidencia demuestra mi respuesta.
- ☐ I used at least two math words.
Usé por lo menos dos palabras matemáticas.
- ☐ I reread complete sentences and punctuation.
Volví a leer mis oraciones completas y la puntuación.
