

# Determine the Area of Parallelograms and Rhombuses

Lesson 5-1

**Name:** Type your name

**Date:** Today's date

**Class:** Class period

---

## My Notes

Level 2 Standard

### TODAY'S OBJECTIVES

**Content Objective:** I can find the area of a parallelogram using base  $\times$  height.

**Language Objective:** I can explain how I found the area using the words base, height, area, and formula.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

**Fill in each blank as we go. Use the Word Bank to help you.**

### WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Area of Parallelograms

Slanted side

Parallelogram

Parallel

Base

Height

Perpendicular

Area

Composite figure

Formula

Tap any word to see what it means and a picture.

1

The space inside a parallelogram, found with  $A = b \times h$ , is the

2

The leaning side of a parallelogram, which is NOT the height, is the

3

A quadrilateral with two pairs of parallel sides is a

4

Two sides that stay the same distance apart and never meet are

5

The side of a parallelogram you measure the height from at a  $90^\circ$  angle is the

**6** The perpendicular distance between the base and the opposite side is the

.

**7** Two lines that meet at a  $90^\circ$  square corner are  .

**8** The amount of flat space inside a two-dimensional figure is its

.

**9** A shape made of two or more basic shapes combined is a

.

**10** A math rule written with symbols, like  $A = b \times h$ , is a

.

## Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

### 1. Understand the Question

EXPLAIN

**How many tiles does the architect need?**

**Your job:** Answer the question. Use math evidence. Explain how the evidence proves your answer.

*Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.*

## 2. Plan Your Math Words

Check at least two words you will use.

- ☐ **Area of Parallelograms** — The space inside a parallelogram. Formula:  $A = b \times h$ , using the perpendicular height.

*Área de paralelogramos — El espacio dentro de un paralelogramo. Fórmula:  $A = b \times h$ , usando la altura perpendicular.*

- ☐ **Slanted side** — A side that leans instead of going straight up and down. It is not the perpendicular height.

*Lado inclinado — Un lado que está inclinado en vez de subir y bajar verticalmente. No es la altura perpendicular.*

- ☐ **Parallelogram** — A four-sided shape with two pairs of parallel sides.

*Paralelogramo — Una figura de cuatro lados con dos pares de lados paralelos.*

- ☐ **Parallel** — Two lines or sides that stay the same distance apart and never meet.

*Paralelas — Dos líneas o lados que se mantienen a la misma distancia y nunca se cruzan.*

- ☐ **Base** — Any side of a parallelogram can be the base. Once you pick a base, the height must be measured perpendicular (at a  $90^\circ$  angle) to it.

*Base — Cualquier lado de un paralelogramo puede ser la base. Una vez que eliges la base, la altura debe medirse perpendicular (en un ángulo de  $90^\circ$ ) a ella.*

**Say it first:** Say your idea to a partner or quietly to yourself before you write.

*Di tu idea a un compañero o en voz baja antes de escribir.*

**The courtyard's area is \_\_\_\_ sq ft because  $A = \_\_\_ \times \_\_\_$ . She needs \_\_\_\_ tiles because  $\_\_\_ / 2 = \_\_\_$ .**

*Di tu respuesta primero: Mi respuesta es \_\_\_\_ porque \_\_\_\_.*

### 3. Build Your Explanation

**Model the parts:** This model shows the parts of an explanation. It does not answer your writing question.

**Claim:** We use the height because it is perpendicular to the base.

**Evidence:** Students connect 'height' to the perpendicular (straight-up) distance from base to top, and recognize the slanted side is longer and would overstate the area.

**Reasoning:** This evidence connects the definition of area of parallelograms to the mathematical claim.

#### Start

Most language support

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- The courtyard's area is \_\_\_\_ sq ft because  $A = \text{____} \times \text{____}$ . She needs \_\_\_\_ tiles because  $\text{____} / 2 = \text{____}$ .
- My answer is \_\_\_\_.

*Mi respuesta es \_\_\_\_.*

---

---

---

---

#### Build

Some language support

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- My claim is \_\_\_\_.
- I know because \_\_\_\_.

*Mi afirmación es \_\_\_\_.*

*Lo sé porque \_\_\_\_.*

- So \_\_\_\_.

*Entonces \_\_\_\_.*

---

---

---

## Explain

### Light language support

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

- **My claim is \_\_\_\_.**  
*Mi afirmación es \_\_\_\_.*
- **My math evidence is \_\_\_\_.**  
*Mi evidencia matemática es \_\_\_\_.*
- **This proves \_\_\_\_ because \_\_\_\_.**  
*Esto demuestra \_\_\_\_ porque \_\_\_\_.*

---

---

---

---

---

## 4. Check Your Explanation

- ☐ I answered the question.  
*Respondí la pregunta.*
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.  
*Usé evidencia matemática: números, una ecuación, un modelo o una comparación.*
- ☐ I explained how the evidence proves my answer.  
*Explicué cómo la evidencia demuestra mi respuesta.*
- ☐ I used at least two math words.  
*Usé por lo menos dos palabras matemáticas.*
- ☐ I reread complete sentences and punctuation.  
*Volví a leer mis oraciones completas y la puntuación.*
