

Words-to-Expression Match

Unit 6: Music Studio • Lesson 6-3 • EduWonderLab

UNIT 6 • LESSON 6-3 • TEACHER NOTES

Standard 6.EE.2a

FORMAT Phrase matching + create

TIME 25–30 min

GROUPING Pairs

TOPIC Write Algebraic Expressions

STANDARD 6.EE.2a

PREP LEVEL Light — print phrase cards, expression cards, blanks

Learning goal *I can translate a word phrase into an algebraic expression.*

Teacher setup

- Print one set per pair. Students match each phrase to its expression.
- Then they write one new situation for a partner to match.
- Include keyword caution cards (“less than” reverses the order).

Materials

Phrase cards, Expression cards, Blank challenge cards, Keyword caution cards, Pencil.

Differentiation & language support

- Keyword chart: more/sum (+), less/difference (–), product ($\times$), quotient ($\div$) (SPED).
- Sentence stem: “The phrase ____ means ____ because ____.”
- ESOL: underline the operation word in each phrase.

Key vocabulary (English / Español):

Term	Español	What it means
expression	expresión	numbers, variables, and operations
variable	variable	a letter that stands for a number

Quick teacher check: *Check Card 6 — the “less than” order trap.*

Words-to-Expression Match

Unit 6: Music Studio · Lesson 6-3 · EduWonderLab

Name: _____ Date: _____ Class: _____

Your goal: *I can translate a word phrase into an algebraic expression.*

What you need

Phrase cards, Expression cards, Blank cards.

How to play

1. Read a phrase card.
2. Find the matching algebraic expression.
3. Check operation keywords carefully.
4. Write one new phrase on a blank card for your partner.

Phrase Cards

Match each phrase to its expression. Watch out for “less than,” which reverses the order.

1. “5 more than a number”	2. “twice a number”
3. “a number decreased by 7”	4. “the product of 3 and a number”
5. “a number divided by 4”	6. “8 less than a number”
7. “the sum of a number and 10”	8. “4 times a number, plus 2”

Record your work (phrase → expression):

Explain your thinking

Explain why “8 less than a number” is $x - 8$ and not $8 - x$.

Sentence frame: *The phrase ___ means ___ because the keyword is ___.*

★ **Challenge:** Write a phrase that matches $2x + 5$. Then write a phrase that matches $2(x + 5)$.

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 6 • LESSON 6-3 • Words-to-Expression Match

Standard 6.EE.2a

Answers

1. "5 more than a number" Answer: $x + 5$	2. "twice a number" Answer: $2x$
3. "a number decreased by 7" Answer: $x - 7$	4. "the product of 3 and a number" Answer: $3x$
5. "a number divided by 4" Answer: $x \div 4$ ($x/4$)	6. "8 less than a number" Answer: $x - 8$ (not $8 - x$)
7. "the sum of a number and 10" Answer: $x + 10$	8. "4 times a number, plus 2" Answer: $4x + 2$

Teaching notes & look-fors

- "Less than" and "subtracted from" reverse the order: 8 less than $x = x - 8$.
- Challenge shows $2x + 5$ vs $2(x + 5)$ are different expressions.
