

Lesson 2.10 Explain Your Thinking

Session 1 · Mean or Median?

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
outlier	valor atípico
skewed	asimétrico
symmetric	simétrico
measure of center	medida de centro

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

For ____ I choose the ____, because _____. For a different purpose, ____ could be useful.

3 · Choose a connected sentence

Because: My conclusion follows because _____.

But: Selects a measure mechanically without connecting it to the question. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____, so _____.

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.

GRADE 6 MATHEMATICS | STUDENT SUPPORT

Session 2 · Matching Center and Spread

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
symmetric	simétrico
skewed	asimétrico
mean and MAD	media y DMA
median and IQR	mediana y rango intercuartil

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

The distribution is ____, so I describe its center with ____ and its spread with ____ because ____.

3 · Choose a connected sentence

Because: My conclusion follows because ____.

But: Pairs a center and spread without inspecting shape or assumes a resistant measure never changes. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____, so ____.

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.
