

Lesson 2.7 Explain Your Thinking

Session 1 · Dividing a Decimal by a Whole Number

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
dividend	dividendo
divisor	divisor
quotient	cociente
annex a zero	agregar un cero

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

I divided ____ tenths into ____ groups, so each group has ____ tenths, or ____.

3 · Choose a connected sentence

Because: My conclusion follows because ____.

But: Divides whole-number digits correctly but loses the value represented by each digit. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____, so ____.

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.

GRADE 6 MATHEMATICS | STUDENT SUPPORT
Session 2 · Dividing by a Decimal

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
divisor	divisor
equivalent division	división equivalente
power of ten	potencia de diez

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

Both quantities became ____ times as large numerically, but their ratio stayed ____ because ____.

3 · Choose a connected sentence

Because: My conclusion follows because ____.

But: Moves a decimal in only one number or assumes division always makes a number smaller. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____, so ____.

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.
