

Lesson 2.9 Explain Your Thinking

Session 1 · Finding Mean Absolute Deviation (MAD)

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
mean absolute deviation	desviación media absoluta
deviation	desviación
absolute value	valor absoluto
spread	dispersión

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

The MAD is ____ because the total distance ____ is divided by ____ . It describes ____ .

3 · Choose a connected sentence

Because: My conclusion follows because ____ .

But: Averages signed deviations or stops after adding the distances. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____ , so ____ .

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.

GRADE 6 MATHEMATICS | STUDENT SUPPORT

Session 2 · Comparing Data Sets Using MAD

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
variation	variación
consistent	consistente
mean absolute deviation	desviación media absoluta

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

Both sets have mean ____, but set ____ has a smaller MAD, so ____.

3 · Choose a connected sentence

Because: My conclusion follows because ____.

But: Assumes equal means imply equal distributions or equal variability. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____, so ____.

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.
