

Lesson 3.7 Explain Your Thinking

Session 1 · Customary vs. Metric Conversions

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
conversion factor	factor de conversión
approximately ($\approx$)	aproximadamente
reasonableness	razonabilidad

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

The mass is approximately ____ because ____; I use $\approx$ since ____.

3 · Choose a connected sentence

Because: My conclusion follows because ____.

But: Uses an exact-equality claim for an approximate cross-system factor or multiplies in the wrong direction. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____, so ____.

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.

GRADE 6 MATHEMATICS | STUDENT SUPPORT

Session 2 · Multi-Step System Conversions and Dosage

Use the “Model, reason, and explain” task in your Guided Notes. Keep the same mathematical task; choose only the support you need.

English math word	Spanish
multi-step	de varios pasos
dose	dosis
per	por

1 · Represent the relationship

Point to, draw, or label the important quantities and units.

2 · Rehearse with a partner

I first convert ____ to ____ so that the rate ____ can be applied. Then ____.

3 · Choose a connected sentence

Because: My conclusion follows because ____.

But: Uses the rate before converting its reference quantity or confuses grams of pigment with grams of clay. may seem reasonable, but ____ shows why it fails.

So: The relationship in my model is ____, so ____.

Check: I answered the task, included mathematical evidence, and explained the connection. Next time I can try with one fewer support.
