

Divide Decimals Using an Algorithm

Lesson 2-7

Name: Type your name

Date: Today's date

Class: Class period

TODAY'S OBJECTIVES

Content Objective: I can divide with decimals by making the divisor a whole number first.

Language Objective: I can explain my work using the words dividend, divisor, quotient, and equivalent division.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Dividend

Divisor

Quotient

Decimal Division Algorithm

Equivalent division

Annex a zero

Algorithm

Power of ten

Tap any word to see its meaning and a picture.

1

In a division problem, the total amount being divided is the

2

In a division problem, the number of equal groups you divide into is the

3

The answer to a division problem is the

4

The steps that make the divisor whole before you divide are called the

5

Multiplying both the dividend and divisor by the same power of 10 creates an

 that is easier to solve.

6 Writing 7.2 as 7.20 is called a zero.

7 Steps you follow the same way every time make an .

8 10, 100, and 1,000 are each a .

Write About the Math

How does decimal division help you figure out how many pieces you can cut?

¿Cómo te ayuda la división de decimales a averiguar cuántas piezas puedes cortar?

Say your answer to a partner first. Then write it, using at least two of these words:

☐ **Dividend**
Dividendo

☐ **Divisor**
Divisor

☐ **Quotient**
Cociente

☐ **Decimal Division Algorithm**
Algoritmo de división decimal

☐ **Equivalent division**
División equivalente

Model: Move both decimal points the same number of places so the value stays equal. — Students rewrite $18.9 \div 6.3$ as $189 \div 63 = 3$, explaining moving both points one place keeps the division equivalent, so 3 pods are filled.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **I can cut ____ pieces because $16.8 \div 2.4 =$ ____.**
- **My answer is ____ because ____.**
Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
Mi afirmación es ____.
- **My evidence is ____, so ____.**
Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

☐ I answered the question.

☐ I used math evidence: numbers, an equation, or a model.

☐ I used at least two math words.
