

Place a number on a scaled number line and read distance from it

Six practice tasks · Accuracy and explanation before speed

Clothesline / Number Line Flash: Draw a line with endpoints 0 and 20 partitioned into 5 equal jumps. Ask: "What is each jump worth?" Follow up: "Where does 14 live relative to the tick marks?"

Name: _____ Date: _____

1. 0 to 20 in 5 equal jumps — one jump is worth?

2. 0 to 100 in 4 equal jumps — one jump?

3. 0 to 1 in 10 equal jumps — one jump?

4. -10 to 10 in 4 equal jumps — one jump?

5. How far is 14 from 6?

6. How far is -3 from 5?

Reflect: Which two tasks used a related strategy? Explain the connection.

Multiply and divide by 10, 100, and 1000 by shifting the decimal

Six practice tasks · Accuracy and explanation before speed

Place-Value Shift Drill: Flash three expressions: 0.72×100 , $4.5 \div 10$, 0.03×1000 . Students show answers on mini-whiteboards with arrows showing the directional decimal jump.

Name: _____ Date: _____

1. 0.72×100

2. $4.5 \div 10$

3. 0.03×1000

4. $620 \div 100$

5. 0.8×10

6. $95 \div 1000$

Reflect: Which two tasks used a related strategy? Explain the connection.

Scale a pair of numbers by the same factor

Six practice tasks · Accuracy and explanation before speed

Spot the Imposter Ratio: Project three candidate equivalent pairs for 4 : 7: [8 : 14], [12 : 21], [9 : 12]. Ask students which pair fell into the additive trap and why.

Name: _____ Date: _____

1. $2 : 5 = 8 : ?$

2. $3 : 4 = ? : 20$

3. Is 4 : 7 equivalent to 12 : 21?

4. Is 4 : 7 equivalent to 8 : 11?

5. 6 : 9 in simplest form

6. $5 : 2 = 35 : ?$

Reflect: Which two tasks used a related strategy? Explain the connection.

Plot and read ordered pairs on a coordinate plane

Six practice tasks · Accuracy and explanation before speed

Run Then Jump Quick Drill: Call out an ordered pair (e.g., (5, 3) or (-4, 2)). Students state aloud the movement: "5 units across the floor, 3 units up the elevator" and point on a displayed grid.

Name: _____ Date: _____

1. Name the quadrant of (-4, 2)

2. Name the quadrant of (3, -7)

3. From the origin, 5 right and 2 down is...

4. Reflect (2, 6) across the x-axis

5. If each gridline is 5, where is 35?

6. Distance from (1, 4) to (9, 4)

Reflect: Which two tasks used a related strategy? Explain the connection.

Order a list of numbers least to greatest

Six practice tasks · Accuracy and explanation before speed

5-Card Rapid Sort: Post five unsorted numbers on the board (e.g., 0.4, 0.25, 0.08, 0.5, 0.19). Students write them in order in 30 seconds and circle the median.

Name: _____ Date: _____

1. Order: 0.4, 0.25, 0.08, 0.5, 0.19

2. Order: 12, 7, 19, 4, 15

3. Order: -3, 1.5, -0.5, 0

4. Which is greater, 0.125 or 0.4?

5. Which is less, -8 or -2?

6. Median of 4, 6, 9, 11, 15

Reflect: Which two tasks used a related strategy? Explain the connection.

Move among a fraction, a decimal, and a percent

Six practice tasks · Accuracy and explanation before speed

Benchmark Triplet Call-and-Response: Teacher states: "Three-fourths!" Students write: 0.75 and 75%.
Teacher states: 0.05; students respond: 5% and 1/20.

Name: _____ Date: _____

1. 3/4 as a decimal and a percent

2. 0.05 as a percent and a fraction

3. 1/5 as a decimal and a percent

4. 40% as a fraction in simplest form

5. 0.6 as a percent

6. Which is greater, 0.7 or 65%?

Reflect: Which two tasks used a related strategy? Explain the connection.

Follow order of operations, including parentheses and exponents

Six practice tasks · Accuracy and explanation before speed

Circle the First Move: Project $3 + 4 \times 2^2 - (5 + 1)$. Ask students: "Do not calculate the answer. State only which operation is performed first, and which is performed second."

Name: _____ Date: _____

1. $4 + 3 \times 2$

2. $(4 + 3) \times 2$

3. $3 + 2^3$

4. $20 - 12 \div 4$

5. $\frac{1}{2} \times (6 + 10) \times 4$

6. $2 \times (3 + 4)^2$

Reflect: Which two tasks used a related strategy? Explain the connection.

Name the inverse of an operation and check by substituting back

Six practice tasks · Accuracy and explanation before speed

Undo & Prove: Display $m + 14 = 30$. Ask: 1) What operation undoes $+14$? 2) What is m ? 3) Substitute your answer to prove the equation balances.

Name: _____ Date: _____

1. What undoes $+ 14$?

2. What undoes $\times 6$?

3. $m + 14 = 30$, so $m =$

4. $6x = 42$, so $x =$

5. $x \div 5 = 9$, so $x =$

6. Check $x = 7$ in $6x = 42$

Reflect: Which two tasks used a related strategy? Explain the connection.

Add a list of numbers to a running total

Six practice tasks · Accuracy and explanation before speed

Make-a-Ten Combinations: Project a string of 6 numbers: 12, 18, 25, 15, 9, 11. Have students bracket compatible pairs ($12+18=30$, $25+15=40$, $9+11=20$) to compute 90 mentally.

Name: _____ Date: _____

1. $12 + 18 + 25 + 15 + 9 + 11$

2. $7 + 13 + 24 + 6$

3. $18 + 18 + 24 + 24 + 30 + 30$

4. $10 + 14 + 8 + 12 + 16$

5. $2.5 + 3.5 + 4$

6. Mean of 10, 14, 8, 12, 16

Reflect: Which two tasks used a related strategy? Explain the connection.

Find the area of a rectangle and of a triangle

Six practice tasks · Accuracy and explanation before speed

Perpendicular Detective: Display a non-right triangle and a slanted parallelogram with 3 labeled side lengths. Students identify which dimension is the genuine perpendicular height.

Name: _____ Date: _____

1. Area of an 8 by 5 rectangle

2. Area of a triangle, base 7, height 4

3. Parallelogram base 12, slant 5, height 4 — area?

4. $\frac{1}{2} \times (6 + 10) \times 4$

5. Triangle area 36, base 12 — height?

6. Is the slanted side ever the height?

Reflect: Which two tasks used a related strategy? Explain the connection.

Multiply and divide with fractions and mixed numbers

Six practice tasks · Accuracy and explanation before speed

Improper & Reciprocal Sprint: Flash 2 3/4. Students write improper fraction (11/4) and reciprocal (4/11) on whiteboards in under 20 seconds.

Name: _____ Date: _____

1. 2 3/4 as an improper fraction

2. Reciprocal of 11/4

3. $\frac{2}{3} \times \frac{5}{4}$

4. $3 \div \frac{1}{4}$

5. $6 \div \frac{3}{4}$

6. Reciprocal of 5

Reflect: Which two tasks used a related strategy? Explain the connection.
