GRADE 6 MATHEMATICS · REVEAL MATH

Unit 2

Statistics and Data Displays

Teacher Guide · Contents · Lesson Map

Lesson 2-1 Statistical Questions · Dot Plots and Shape

Lesson 2-2 Building a Histogram · Describing Histogram Shape

Lesson 2-3 Finding the Median · Median of an Even Data Set

Lesson 2-4 Building a Box Plot · Comparing Box Plots

Lesson 2-5 Range and IQR · Comparing Variability

Lesson 2-6 Median and Outliers · Comparing Distributions

Lesson 2-7 Dividing a Decimal by a Whole Number · Dividing by a Decimal

Lesson 2-8 Finding the Mean · Reaching a Target Mean

Lesson 2-9 Finding Mean Absolute Deviation (MAD) · Comparing Data Sets Using MAD

Lesson 2-10 Mean or Median? · Matching Center and Spread

What's in each lesson folder

N.M.pptx	Teaching slides for both sessions (warm-up, launch, worked examples, practice).
Warm-Up	One page of skills the lesson assumes. Answers: Unit Warm-Up Key.
Prerequisite Practice	A and B sheets per session for students who need a missing skill first, plus a key.
Guided Notes	Core notes plus model/reasoning pages for both sessions. Select the current session pages in Print Packets.
Practice	Form A (class) and Form B (reteach / retake) per session. 11 numbered problems with subparts. Use the lesson route to select the core set; see the current PDF for page count.
Exit Tickets	One page per session, two tickets per page. Three quick items and a self-rating.
Homework	Core: 1 page per session. Supported: 2 pages per session; print duplex as 2 sheets. Same problems and answers, with language supports.
Answer Key	Every answer for notes, practice (both forms), exit tickets and homework; talk prompts, partner task, misconceptions; item analysis.

A lesson in two sessions

Session 1	Warm-Up → slides + Guided Notes (page 1) → Practice Form A → Exit Ticket → Homework Sheet 1
Session 2	Slides + Guided Notes (page 2) → Practice Form A → Exit Ticket → Homework Sheet 2
Next day	Use the lesson Teaching Support Guide to match errors to feedback, revision and a fresh check. Confidence ratings inform support; they do not replace work evidence.

Lesson map

Lesson	Session	Standard	Learning target
2-1	1 · Statistical Questions	6.SP.A.1	I can tell whether a question is statistical by deciding if the answers will vary.
2-1	2 · Dot Plots and Shape	6.SP.B.4	I can build a dot plot and describe the shape of the data it shows.
2-2	1 · Building a Histogram	6.SP.B.4	I can group data into equal intervals and build a histogram from a frequency table.
2-2	2 · Describing Histogram Shape	6.SP.B.4	I can describe the shape of a histogram using its peak, spread, and balance.
2-3	1 · Finding the Median	6.SP.B.5c	I can find the median of a data set by ordering the values and taking the middle one.
2-3	2 · Median of an Even Data Set	6.SP.B.5c	I can find the median of a data set with an even number of values by averaging the two middle values.
2-4	1 · Building a Box Plot	6.SP.B.4	I can find the five-number summary of a data set and use it to build a box plot.
2-4	2 · Comparing Box Plots	6.SP.B.4	I can compare two groups by reading the medians and box widths of their box plots.
2-5	1 · Range and IQR	6.SP.B.5c	I can find the range and the interquartile range of a data set.
2-5	2 · Comparing Variability	6.SP.B.5c	I can compare the variability of two data sets using range and IQR.
2-6	1 · Median and Outliers	6.SP.B.5d	I can explain why the median is a better measure of center than the mean when a data set has an outlier.
2-6	2 · Comparing Distributions	6.SP.B.5d	I can compare two distributions using the median and the interquartile range together.
2-7	1 · Dividing a Decimal by a Whole Number	6.NS.B.3	I can divide a decimal by a whole number and place the decimal point correctly.
2-7	2 · Dividing by a Decimal	6.NS.B.3	I can divide by a decimal by making the divisor a whole number first.
2-8	1 · Finding the Mean	6.SP.B.5c	I can find the mean of a data set by sharing the total equally among the values.
2-8	2 · Reaching a Target Mean	6.SP.B.5c	I can find the value a data set still needs in order to reach a target mean.
2-9	1 · Finding Mean Absolute Deviation (MAD)	6.SP.B.5c	I can find the mean absolute deviation of a data set and explain what it measures.
2-9	2 · Comparing Data Sets Using MAD	6.SP.B.5c	I can compare two data sets that share a mean by comparing their mean absolute deviations.
2-10	1 · Mean or Median?	6.SP.B.5d	I can choose the mean or the median to describe a data set based on its shape.
2-10	2 · Matching Center and Spread	6.SP.B.5d	I can match a measure of center and a measure of spread to the shape of a data set.

Teaching, assessment, and retrieval route

Use the current lesson Teaching Support Guide for copy counts, planned 45-minute route, item-specific feedback, and a reserved recheck. Student notes now include full-size conceptual task pages; select them deliberately rather than assigning every page in one session.

Resource	Use	Key/response
Readiness Check	Before the unit; identify access to upcoming skills.	Matching Teacher Key; plan prerequisites without labeling students.
Midunit Check	After the first half of the unit.	Review the item scope before assigning; use the matching key.
End Form A	After all relevant targets have been taught.	Separate Teacher Key; item criteria and partial credit.
End Form B	After revision, only if unseen.	Parallel Teacher Key; independent evidence.
Synthesis Task	Connect several taught representations and decisions.	Worked anchor and an 8-point analytic rubric.

Readiness and midunit checks are short teacher-authored samples, not exhaustive tests. The end forms also sample the unit; use lesson exit evidence for targets not sampled. Preserve the existing Unit 3 Version B test as a separate publisher-aligned retained assessment.

Retrieval and intervention

2.1: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

2.2: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

2.3: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

2.4: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

2.5: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

2.6: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

2.7: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

2.8: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

2.9: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

2.10: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.
