Unit 3 Test Version B Reference Sheet

Student reference · use with the matching test

Measurement facts

Equal or approximately equal measures	Use
1 yard = 3 feet	Exact length conversion
1 foot = 12 inches	Exact length conversion
1 kilogram ≈ 2.2 pounds	Approximate conversion between metric and customary mass

Read the test diagrams

Question 5: the top number line shows hours; the bottom number line shows dollars earned. Matching ticks represent the same amount of time. Question 7: the horizontal axis is pages and the vertical axis is stickers. For a tape diagram, all boxes represent equal quantities.

Check your work

Keep the ratio quantities in the stated order. Label units. Compare rates using the same unit. Check whether a conversion should increase or decrease the numerical value.
