Unit 3 Word Wall & Study Cards

Cut on the dashed lines. Use for a word wall, partner quizzing, or a ring of study cards.

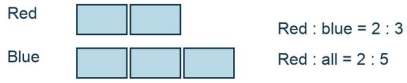

LESSON 3-1

ratio

razón

A comparison of two amounts.

Example 3 to 5, 3 : 5, 3/5

Cover the definition. Explain how the picture shows this word.

LESSON 3-1

term

término

One of the two numbers in a ratio.

Example In 3 : 5, the terms are 3 and 5.

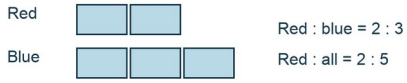

LESSON 3-1

part-to-part

parte a parte

Compares one group with another group.

Example apples : oranges

Cover the definition. Explain how the picture shows this word.

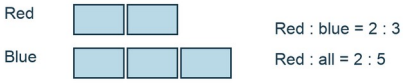

LESSON 3-1

part-to-whole

parte al todo

Compares one group with the total.

Example apples : all the fruit

Cover the definition. Explain how the picture shows this word.

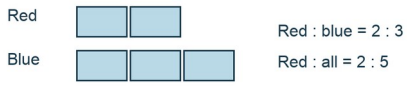

LESSON 3-1

tape diagram

diagrama de cinta

A drawing with equal boxes that shows a ratio.

Example 2 boxes : 3 boxes

Cover the definition. Explain how the picture shows this word.

LESSON 3-1

unit (one box)

unidad

The amount inside one box.

Example 24 ÷ 4 boxes = 6 in each box

LESSON 3-1

total parts

partes totales

All the boxes added together.

Example 3 + 1 = 4 parts

LESSON 3-2

rate

tasa

A comparison of two amounts with different units.

Example 96 pages in 3 hours

LESSON 3-2

unit rate

tasa unitaria

The amount for exactly 1 unit.

Example 32 pages per 1 hour

LESSON 3-2

per

por

Means "for each" one.

Example miles per hour

LESSON 3-2

constant rate

tasa constante

The amount stays the same every time.

Example 15 pages every minute

LESSON 3-2

unit price

precio unitario

The cost of exactly one item or unit.

Example $1.75 per pound

LESSON 3-2

better buy

mejor compra

The choice with the lower unit price.

Example $1.60 < $1.75

LESSON 3-2

total price

precio total

What the whole package costs.

Example $9.60 for the bag

LESSON 3-3

equivalent ratios

razones equivalentes

Ratios that make the same comparison.

Example 2 : 3 and 4 : 6

LESSON 3-3

ratio table

tabla de razones

A table of equivalent ratios. Each column is one pair.

Example 3 : 2, 6 : 4, 9 : 6

LESSON 3-3

scale factor

factor de escala

The number you multiply or divide both terms by.

Example 2 : 3 × 4 = 8 : 12

LESSON 3-3

bridge ratio

razón puente

A smaller equivalent ratio you build first, then scale up.

Example 8 : 20 = 2 : 5

LESSON 3-3

simplify

simplificar

Divide both terms by the same number.

Example 8 : 20 ÷ 4 = 2 : 5

LESSON 3-3

greatest common factor

máximo común divisor

The largest number that divides both terms.

Example GCF of 8 and 20 is 4

LESSON 3-4

coordinate plane

plano de coordenadas

A grid where you plot points.

Example x across, y up

LESSON 3-4

ordered pair

par ordenado

(x, y) names one point: across first, then up.

Example (2, 14)

LESSON 3-4

origin

origen

The point (0, 0) where the axes cross.

Example 0 trays, 0 muffins

LESSON 3-4

unit rate point

punto de tasa unitaria

The point (1, r). The r is the amount for one.

Example (1, 9): 9 for each 1

LESSON 3-4

interpret

interpretar

To say in words what a point means.

Example (4, 36): 4 driveways earn $36

LESSON 3-5

common multiple

múltiplo común

A number both terms can be scaled to.

Example 2 and 3 both reach 6

LESSON 3-5

least common multiple

mínimo común múltiplo

The smallest number that is a multiple of both numbers.

Example LCM of 2 and 3 is 6

LESSON 3-5

stronger

más fuerte

More of the main ingredient for the same amount of water.

Example 6 : 14 is stronger than 6 : 15

LESSON 3-5

benchmark

punto de referencia

A shared amount you scale both choices to.

Example 12 lb for both stores

LESSON 3-6

customary units

unidades usuales

U.S. units like inches, pounds, cups and gallons.

Example 12 in = 1 ft

LESSON 3-6

convert

convertir

Write the same amount with a different unit.

Example 6 ft = 72 in

LESSON 3-6

conversion factor

factor de conversión

A fact that shows two equal amounts.

Example 1 lb = 16 oz

LESSON 3-6

metric units

unidades métricas

Meters, grams and liters, built on tens.

Example 1 km = 1,000 m

LESSON 3-6

kilo- / centi- / milli-

kilo- / centi- / mili-

Kilo means 1,000 times. Centi means one hundredth. Milli means one thousandth.

Example km, cm, mL

LESSON 3-6

powers of 10

potencias de 10

10, 100, 1,000. Metric changes shift the decimal point.

Example 3.5 m = 350 cm

LESSON 3-7

approximately

aproximadamente

About. The symbol ≈ means "about equal to."

Example 1 kg ≈ 2.2 lb

LESSON 3-7

reasonableness

razonabilidad

Checking that your answer's size makes sense.

Example bigger unit, smaller number

LESSON 3-7

multi-step

de varios pasos

Do two or more operations in order.

Example convert, then multiply

LESSON 3-7

dose

dosis

The amount of medicine to give.

Example 120 mg
