Unit 3 Vocabulary Retrieval Guide

Use the existing bilingual vocabulary cards with their diagrams. Study-card use: retrieve the meaning without looking, draw an example and nonexample, then explain which feature distinguishes them. Word-wall use needs a larger display size; do not claim the study-card print is readable across a room.

Lesson 3.1

Retrieve: ratio, term, part-to-part, part-to-whole, tape diagram, unit, total parts.

Explain with the lesson model: The second term counts ___, so my ratio is ___ rather than ___.

Lesson 3.2

Retrieve: rate, unit rate, per, constant, unit price, better buy, total price.

Explain with the lesson model: I need ___ per ___, so I divide ___ by ___.

Lesson 3.3

Retrieve: equivalent ratios, ratio table, scale factor, bridge ratio, simplify, greatest common factor.

Explain with the lesson model: Both quantities are multiplied by ___, so the relationship remains ___.

Lesson 3.4

Retrieve: coordinate plane, ordered pair, origin, unit rate point, interpret, coordinates.

Explain with the lesson model: The point (___, ___) means ___ trays hold ___ muffins.

Lesson 3.5

Retrieve: common multiple, least common multiple, stronger / weaker, benchmark, rate, unit rate.

Explain with the lesson model: For the same ___ cups of concentrate, ___ uses ___ water, so ___.

Lesson 3.6

Retrieve: customary units, convert, conversion factor, metric units, powers of 10.

Explain with the lesson model: The exact length is ___ yards, but I buy ___ because ___ would not be enough.

Lesson 3.7

Retrieve: conversion factor, approximately (≈), reasonableness, multi-step, dose, per.

Explain with the lesson model: The mass is approximately ___ because ___; I use ≈ since ___.

Spanish terms are vocabulary access supports, not a complete Spanish edition. A proficient bilingual review is still required before claiming independently verified translation quality.
