Answers and Scoring

6 items · 14 points · teacher-made classroom check aligned to Maryland 6.AT.4 (not a standardized or publisher test)

BLUEPRINT

lesson, depth of knowledge and points for each item

#	Lesson	DOK	Pts	Answer
1	4.1 S1 / 4.2 S1	1	3	a. 48% b. 0.48 c. 12/25
2	4.1 S2	2	3	250%. Each part is 3 lb = 50%; 15 lb is 5 parts = 250%.
3	4.2 S2	2	3	70%, 75%, 72% so 0.7 < 72% < 3/4
4	4.3 S1	2	2	About 50%: 31 of 60 is close to 30 of 60, which is half.
5	4.3 S2	2	2	About 60: 20% of 300 = 60. (Exact: 62.16.) Accept 59–63 with friendly numbers shown, e.g. 21% of 300 = 63.
6	4.3 S2	1	1	**B** (100)

SCORING AND WHAT TO WATCH FOR

accept equivalent methods and drawings

1. **3 pt** · 48 squares shaded and 48%; 0.48; 12/25 (accept 48/100 for 0.5)
Watch for: Writes 0.048 or 4.8: one square = 0.01.

2. **3 pt** · Uses 6 lb as 100% (the whole); Finds 50% per 3 lb or 15/6 = 2.5; 250%
Watch for: 40% (6/15): uses the new weight as the whole.

3. **3 pt** · 0.7 = 70%; 3/4 = 75%; Correct order
Watch for: Orders 3/4 first because 3 and 4 are small numbers.

4. **2 pt** · About 50%; Names the benchmark 30 of 60 = 1/2
Watch for: 31%: uses the part as the percent.

5. **2 pt** · Friendly percent and number shown (20%, 300); Reasonable estimate 60–63
Watch for: About 6 or 600: place-value slip in 10% of 300.

6. **1 pt** · 1 point
Watch for: A (51) copies the percent as the amount; D (25) uses 1/4.

After scoring: sort errors into wrong whole/model, calculation slip, or explanation. Reteach with that lesson's Teaching Support Guide, then use its fresh check. Do not reuse a form the student has seen.
