SCORING AND WHAT TO WATCH FOR

accept equivalent methods and drawings

1. **3 pt** · 1 point each
Watch for: Adds instead of multiplies (3/4 so 99/100): review scaling both numbers by the same factor. If missed, use Lesson 4.1 Prerequisite Practice.

2. **3 pt** · 1 point each
Watch for: Writes 4/5 as 0.45: digits copied, not place value. If missed, use Lesson 4.2 Prerequisite Practice.

3. **3 pt** · 1 point each
Watch for: Picks 0.56 or 0.305 ("more digits is bigger"): line up places first. If missed, use Lesson 4.2 Prerequisite Practice (Session 2).

4. **3 pt** · 1 point each
Watch for: 0.1 × 70 = 700: multiplies by 10 instead of finding one tenth. If missed, use Lesson 4.4 Prerequisite Practice.

5. **2 pt** · 1 point each blank
Watch for: Adds 2 each time in both rows: review multiplying both quantities. If missed, use Lesson 4.5 Prerequisite Practice.

6. **1 pt** · 1 point
Watch for: B (0.04) reads 40 hundredths as 4 hundredths. If missed, use Lesson 4.2 Prerequisite Practice.

After scoring: sort errors into wrong whole/model, calculation slip, or explanation. Reteach with that lesson's Teaching Support Guide, then use its fresh check. Do not reuse a form the student has seen.
