Bring the Words Back

Two minutes at the start of class. Show the card picture, ask the prompt, and have students say the model sentence with a partner before writing.

ROUTINE

picture, word, say it, write it

1 · Show	Hold up the vocabulary card picture without the word. Students name the word.
2 · Ask	Ask the lesson prompt below. Partners answer aloud using the card words.
3 · Model	Read the model sentence. Students change the numbers and say their own.
4 · Write	One sentence in the notebook. Circle the vocabulary word you used.

PROMPTS BY LESSON

use after each lesson and again one week later

Lesson	Words	Prompt	Model sentence
Lesson 4-1	percent · whole · percent greater than 100%	What does 140% of a number mean? Draw it.	140% means 1.4 times the whole. It is the whole and 40% more, so it is bigger than the whole.
Lesson 4-2	fraction · decimal · percent · compare	Which is greater, 3/5 or 0.65? How do you know?	3/5 is 60% and 0.65 is 65%, so 0.65 is greater. I wrote both as percents to compare.
Lesson 4-3	benchmark percent · estimate · compatible numbers	About what is 26% of 81?	26% is close to 25% and 81 is close to 80. 25% of 80 is 20, so the answer is about 20.
Lesson 4-4	percent of a number · discount · rate	A $40 shirt is 30% off. How much do you save?	10% of $40 is $4, so 30% is 3 × $4 = $12. I save $12.
Lesson 4-5	part · whole · equation	18 is 60% of a number. What is the number?	60% is 18, so 20% is 6 and 100% is 5 × 6 = 30. The whole is 30.

Spanish terms are on every card. Accept answers in English, Spanish or a labeled drawing; then rehearse the English sentence together.
