Unit 6 Midunit Check Teacher Key

4 items · 3 points each · 12 total. Award 1 for a valid model/setup, 1 for correct mathematics/units, and 1 for a requested justification. Use the applicable evidence when the task is conceptual; accept equivalent methods and response modes. Do not count writing length as mathematical mastery.

Item 1

Prompt: How many 1/4-meter portions fit in 3 meters? Model and check.

Solution / evidence: 12; 12×1/4=3 m.

Item 2

Prompt: A 7/8-meter strip is divided by a 1/4-meter group size. Find the numerical quotient and complete-group count.

Solution / evidence: 7/2 = 3.5 groups numerically; 3 complete groups, with 1/8 m left.

Item 3

Prompt: Expand and evaluate 3^3. Explain why it differs from 3×3.

Solution / evidence: 3×3×3=27; 3×3=9.

Item 4

Prompt: Evaluate 18÷3×2 and $(2+3)^2$. State the order used.

Solution / evidence: 12 and 25; division/multiplication left to right; grouping then power.

Response: group errors by interpretation/model versus calculation versus explanation. Use the corresponding lesson Teaching Support Guide, revise one step, and reassess with its reserved fresh check. Do not reuse the already seen form as independent evidence.
