Unit 6 Vocabulary Retrieval Guide

Use the existing bilingual vocabulary cards with their diagrams. Study-card use: retrieve the meaning without looking, draw an example and nonexample, then explain which feature distinguishes them. Word-wall use needs a larger display size; do not claim the study-card print is readable across a room.

Lesson 6.1

Retrieve: unit fraction, reciprocal, quotient, multiplicative inverse, divisor.

Explain with the lesson model: My model or expression represents ___ because ___. The structure shows ___, so the result is ___.

Lesson 6.2

Retrieve: reciprocal, dividend, divisor, quotient, mixed number, improper fraction, simplify.

Explain with the lesson model: My model or expression represents ___ because ___. The structure shows ___, so the result is ___.

Lesson 6.3

Retrieve: power, base, exponent, evaluate, squared, cubed, expanded form.

Explain with the lesson model: My model or expression represents ___ because ___. The structure shows ___, so the result is ___.

Lesson 6.4

Retrieve: numerical expression, evaluate, product, order of operations, grouping symbols, left to right.

Explain with the lesson model: My model or expression represents ___ because ___. The structure shows ___, so the result is ___.

Lesson 6.5

Retrieve: variable, coefficient, constant, algebraic expression, substitute, evaluate.

Explain with the lesson model: My model or expression represents ___ because ___. The structure shows ___, so the result is ___.

Lesson 6.6

Retrieve: like terms, combine, equivalent expressions, counterexample, Distributive Property, Commutative Property.

Explain with the lesson model: My model or expression represents ___ because ___. The structure shows ___, so the result is ___.

Lesson 6.7

Retrieve: factor, greatest common factor, prime factorization, multiple, common multiple, least common multiple.

Explain with the lesson model: My model or expression represents ___ because ___. The structure shows ___, so the result is ___.

Lesson 6.8

Retrieve: Distributive Property, like terms, equivalent expressions, expand, factor an expression, greatest common factor.

Explain with the lesson model: My model or expression represents ___ because ___. The structure shows ___, so the result is ___.

Spanish terms are vocabulary access supports, not a complete Spanish edition. A proficient bilingual review is still required before claiming independently verified translation quality.
