Unit 7 End-of-Unit Assessment - Form A Teacher Key

8 items · 3 points each · 24 total. Award 1 for a valid model/setup, 1 for correct mathematics/units, and 1 for a requested justification. Use the applicable evidence when the task is conceptual; accept equivalent methods and response modes. Do not count writing length as mathematical mastery.

Item 1

Prompt: A location is 4 m below sea level. Write signed elevation and explain zero.

Solution / evidence: −4 m; zero is sea level.

Item 2

Prompt: Find the opposite of −4.5 and then the opposite of that result.

Solution / evidence: 4.5, then −4.5; opposite changes the sign and a second opposite restores the original.

Item 3

Prompt: Compare −8 and 4 by ordinary value and distance from zero.

Solution / evidence: 4 is greater; −8 is farther from zero.

Item 4

Prompt: Order −4.5, −19/4, −5, and 0. Explain one comparison.

Solution / evidence: $-5<-19/4<-4.5<0$; the fraction is −4.75.

Item 5

Prompt: Reflect (4,−2) across x then y. Also identify the result for (0,3) reflected across y.

Solution / evidence: (4,2), then (−4,2); (0,3) remains fixed.

Item 6

Prompt: Find distance between (−4,3) and (6,3). Explain the shared coordinate.

Solution / evidence: 10 units; shared y means horizontal distance.

Item 7

Prompt: A rectangle spans x=−2 to 4 and y=−1 to 3. Find perimeter and area.

Solution / evidence: Width 6, height 4; perimeter 20 units; area 24 square units.

Item 8

Prompt: A 3-by-4-unit rectangle uses 4 m per unit. Find real perimeter and area and explain scaling.

Solution / evidence: Dimensions 12×16 m; perimeter 56 m; area 192 m². Area scale factor is 16, not 4.

Response: group errors by interpretation/model versus calculation versus explanation. Use the corresponding lesson Teaching Support Guide, revise one step, and reassess with its reserved fresh check. Do not reuse the already seen form as independent evidence.
