GRADE 6 MATHEMATICS · REVEAL MATH

Unit 7

Integers and Coordinate Plane

Teacher Guide · Contents · Lesson Map

Lesson 7-1	Integers and Opposites · Integers in Real Situations
Lesson 7-2	Rational Numbers on a Number Line · Opposites of Rational Numbers
Lesson 7-3	Absolute Value as Distance · Absolute Value as Total Distance
Lesson 7-4	Comparing Numbers on a Number Line · Ordering Integers and Rational Numbers
Lesson 7-5	Plotting Points on the Coordinate Plane · Reflecting Points Across Axes
Lesson 7-6	Distance Between Points on a Grid · Comparing Distances on the Plane
Lesson 7-7	Polygons and Perimeter on the Plane · Designing Polygons with Scale

What's in each lesson folder

N.M.pptx	Teaching slides for both sessions (warm-up, launch, worked examples, practice).
Warm-Up	One page of skills the lesson assumes. Answers: Unit Warm-Up Key.
Prerequisite Practice	A and B sheets per session for students who need a missing skill first, plus a key.
Guided Notes	Core notes plus model/reasoning pages for both sessions. Select the current session pages in Print Packets.
Practice	Form A (class) and Form B (reteach / retake) per session. 11 numbered problems with subparts. Use the lesson route to select the core set; see the current PDF for page count.
Exit Tickets	One page per session, two tickets per page. Three quick items and a self-rating.
Homework	Core: 1 page per session. Supported: 2 pages per session; print duplex as 2 sheets. Same problems and answers, with language supports.
Answer Key	Every answer for notes, practice (both forms), exit tickets and homework; talk prompts, partner task, misconceptions; item analysis.

A lesson in two sessions

Session 1	Warm-Up → slides + Guided Notes (page 1) → Practice Form A → Exit Ticket → Homework Sheet 1
Session 2	Slides + Guided Notes (page 2) → Practice Form A → Exit Ticket → Homework Sheet 2
Next day	Use the lesson Teaching Support Guide to match errors to feedback, revision and a fresh check. Confidence ratings inform support; they do not replace work evidence.

Lesson map

Lesson	Session	Standard	Learning target
7-1	1 · Integers and Opposites	6.NS.C.5	I can write an integer for a real situation and name its opposite.
7-1	2 · Integers in Real Situations	6.NS.C.5	I can interpret integers in real situations and find the opposite of an opposite.
7-2	1 · Rational Numbers on a Number Line	6.NS.C.6c	I can plot a rational number and its opposite on a number line.
7-2	2 · Opposites of Rational Numbers	6.NS.C.6a	I can find the opposite of a rational number and explain what taking the opposite twice does.
7-3	1 · Absolute Value as Distance	6.NS.C.7c	I can use absolute value to describe how far a number is from zero.
7-3	2 · Absolute Value as Total Distance	6.NS.C.7c	I can use absolute value to find the total distance between a negative and a positive reading.
7-4	1 · Comparing Numbers on a Number Line	6.NS.C.7a	I can compare two rational numbers using their positions on a number line.
7-4	2 · Ordering Integers and Rational Numbers	6.NS.C.7b	I can order integers and rational numbers from least to greatest.
7-5	1 · Plotting Points on the Coordinate Plane	6.NS.C.6c	I can plot a point with rational coordinates and name the quadrant it lies in.
7-5	2 · Reflecting Points Across Axes	6.NS.C.6b	I can reflect a point across the x-axis or the y-axis and name the new coordinates.
7-6	1 · Distance Between Points on a Grid	6.NS.C.8	I can find the distance between two points that share a coordinate.
7-6	2 · Comparing Distances on the Plane	6.NS.C.8	I can decide whether to add or subtract to find a distance, then compare two distances.
7-7	1 · Polygons and Perimeter on the Plane	6.G.A.3	I can find the perimeter and area of a polygon drawn on the coordinate plane.
7-7	2 · Designing Polygons with Scale	6.G.A.3	I can use a scale to find a missing dimension of a figure on the coordinate plane.

Teaching, assessment, and retrieval route

Use the current lesson Teaching Support Guide for copy counts, planned 45-minute route, item-specific feedback, and a reserved recheck. Student notes now include full-size conceptual task pages; select them deliberately rather than assigning every page in one session.

Resource	Use	Key/response
Readiness Check	Before the unit; identify access to upcoming skills.	Matching Teacher Key; plan prerequisites without labeling students.
Midunit Check	After the first half of the unit.	Review the item scope before assigning; use the matching key.
End Form A	After all relevant targets have been taught.	Separate Teacher Key; item criteria and partial credit.
End Form B	After revision, only if unseen.	Parallel Teacher Key; independent evidence.
Synthesis Task	Connect several taught representations and decisions.	Worked anchor and an 8-point analytic rubric.

Readiness and midunit checks are short teacher-authored samples, not exhaustive tests. The end forms also sample the unit; use lesson exit evidence for targets not sampled. Preserve the existing Unit 3 Version B test as a separate publisher-aligned retained assessment.

Retrieval and intervention

7.1: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

7.2: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

7.3: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

7.4: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

7.5: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

7.6: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.

7.7: retrieve one independent item after two lessons and about one week; use the lesson guide to target model, arithmetic, or explanation errors.
