Unit 7 Word Wall & Study Cards

Cut on the dashed lines. Use for a word wall, partner quizzing, or a ring of study cards.

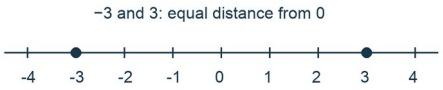

LESSON 7-1

integer

entero

Zero, a counting number, or the opposite of a counting number.

Example −9, −1, 0, 6, 230

Cover the definition. Explain how the picture shows this word.

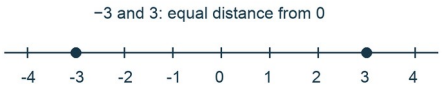

LESSON 7-1

opposite

opuesto

A number the same distance from 0, on the other side of 0.

Example −6 and 6

Cover the definition. Explain how the picture shows this word.

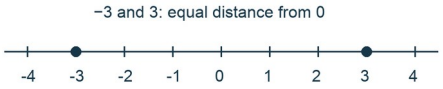

LESSON 7-1

negative number

número negativo

A number less than 0, written with a − sign.

Example −9 is read "negative nine"

Cover the definition. Explain how the picture shows this word.

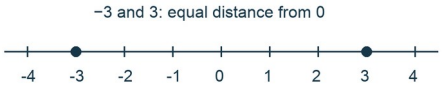

LESSON 7-1

positive number

número positivo

A number greater than 0.

Example 6, 19, 230

Cover the definition. Explain how the picture shows this word.

LESSON 7-1

opposite of the opposite

opuesto del opuesto

Flip across 0 twice and you are back where you started.

Example −(−6) = 6

LESSON 7-2

rational number

número racional

A number that can be written as a fraction of two integers.

Example −3/4, 0.5, 7 = 7/1

LESSON 7-2

number line

recta numérica

A line where numbers increase from left to right.

Example −2 is left of 1, so −2 < 1

LESSON 7-2

opposites

opuestos

Two numbers the same distance from 0, on different sides of 0.

Example −2.5 and 2.5

LESSON 7-2

zero

cero

The only number that is its own opposite.

Example the opposite of 0 is 0

LESSON 7-3

absolute value

valor absoluto

How many units a number is from 0.

Example $|-3| = 3$ and $|3| = 3$

LESSON 7-3

distance

distancia

How many units apart two points are. It is never negative.

Example from 0 to −5 is 5 units

LESSON 7-3

magnitude

magnitud

How big a number is, ignoring its sign.

Example −50 has magnitude 50

LESSON 7-4

greater than (>)

mayor que

Farther to the right on the number line.

Example $3 > -6$

LESSON 7-4

less than (<)

menor que

Farther to the left on the number line.

Example $-6 < -2$

LESSON 7-4

inequality

desigualdad

A math sentence that compares numbers using < or >.

Example $-8 < -5$

LESSON 7-4

order

orden

To list numbers from least to greatest (or greatest to least).

Example $-9, -2, 0, 6$

LESSON 7-4

least

mínimo

The smallest number; it is farthest to the left.

Example -9 is the least

LESSON 7-4

greatest

máximo

The biggest number; it is farthest to the right.

Example 6 is the greatest

LESSON 7-5

coordinate plane

plano de coordenadas

A grid made by a horizontal and a vertical number line.

Example x-axis across, y-axis up and down

LESSON 7-5

ordered pair

par ordenado

Two numbers (x, y) that name one point.

Example (−3, 4)

LESSON 7-5

origin

origen

The point (0, 0) where the two axes cross.

Example start every plot here

LESSON 7-5

quadrant

cuadrante

One of the four sections of the plane.

Example Quadrant II is upper left

LESSON 7-5

reflection

reflexión

A flip that makes a mirror image across a line.

Example (4, 1) becomes (4, −1) across the x-axis

LESSON 7-5

x-axis

eje x

The horizontal number line through the origin.

Example runs left and right

LESSON 7-5

y-axis

eje y

The vertical number line through the origin.

Example runs up and down

LESSON 7-6

horizontal distance

distancia horizontal

Distance side to side. Use the x-coordinates.

Example (−3, 2) to (4, 2)

LESSON 7-6

vertical distance

distancia vertical

Distance up and down. Use the y-coordinates.

Example (5, −1) to (5, 6)

LESSON 7-6

compare

comparar

Decide which amount is greater or less.

Example 12 units > 9 units

LESSON 7-6

scale

escala

How much real length one grid unit stands for.

Example 1 unit = 5 meters

LESSON 7-7

polygon

polígono

A closed shape with straight sides.

Example triangle, rectangle, square

LESSON 7-7

vertex

vértice

A corner point of a polygon.

Example (−2, 3)

LESSON 7-7

perimeter

perímetro

The distance all the way around a shape.

Example add every side length

LESSON 7-7

area

área

The number of square units inside a shape.

Example rectangle: length × width

LESSON 7-7

dimensions

dimensiones

The length and width of a shape.

Example 24 ft by 16 ft
