Unit 8 Vocabulary Retrieval Guide

Use the existing bilingual vocabulary cards with their diagrams. Study-card use: retrieve the meaning without looking, draw an example and nonexample, then explain which feature distinguishes them. Word-wall use needs a larger display size; do not claim the study-card print is readable across a room.

Lesson 8.1

Retrieve: equation, solution, substitute, variable, unknown.

Explain with the lesson model: The value or set ___ makes the statement true because ___. I check it by ___.

Lesson 8.2

Retrieve: inverse operation, isolate, one-step equation, Addition Property of Equality, difference.

Explain with the lesson model: The value or set ___ makes the statement true because ___. I check it by ___.

Lesson 8.3

Retrieve: coefficient, inverse operation, Division Property of Equality, divisor, Multiplication Property of Equality, equal groups.

Explain with the lesson model: The value or set ___ makes the statement true because ___. I check it by ___.
