Unit 9 Readiness Check Teacher Key

3 items · 3 points each · 9 total. Award 1 for a valid model/setup, 1 for correct mathematics/units, and 1 for a requested justification. Use the applicable evidence when the task is conceptual; accept equivalent methods and response modes. Do not count writing length as mathematical mastery.

Item 1

Prompt: A rental costs $2 per hour. Identify independent and dependent quantities and explain.

Solution / evidence: Hours is input/independent; cost dependent; cost is computed from hours at 2 dollars/hour.

Item 2

Prompt: For y=2x, give and plot the points at x=0,1,3; label axes.

Solution / evidence: (0,0),(1,2),(3,6); label context-independent input/output axes.

Item 3

Prompt: For y=2x+5, compare x=2 and x=4. Find the change per added input unit; explain why y/x is not the rate.

Solution / evidence: Outputs 9 and 13; change 4 over 2 units gives rate 2. The fee is included in y/x.

Response: group errors by interpretation/model versus calculation versus explanation. Use the corresponding lesson Teaching Support Guide, revise one step, and reassess with its reserved fresh check. Do not reuse the already seen form as independent evidence.
