Unit 9 Word Wall & Study Cards

Cut on the dashed lines. Use for a word wall, partner quizzing, or a ring of study cards.

LESSON 9-1

independent variable

variable independiente

The input: the quantity you choose or that comes first.

Example hours studied

Cover the definition. Explain how the picture shows this word.

LESSON 9-1

dependent variable

variable dependiente

The output: it changes because of the input.

Example quiz score

Cover the definition. Explain how the picture shows this word.

LESSON 9-1

depends on

depende de

The output changes when the input changes.

Example Score depends on study time.

LESSON 9-1

table of values

tabla de valores

A list of inputs matched with their outputs.

Example x: 1, 2 y: 9, 18

Cover the definition. Explain how the picture shows this word.

LESSON 9-1

input

entrada

The number you start with. It goes in the first column.

Example hours worked

Cover the definition. Explain how the picture shows this word.

LESSON 9-1

output

salida

The number you get after you use the rule.

Example boxes packed

Cover the definition. Explain how the picture shows this word.

LESSON 9-2

ordered pair

par ordenado

Two numbers (x, y) that tell where a point is.

Example (3, 12)

LESSON 9-2

coordinates

coordenadas

The two numbers in an ordered pair.

Example x-coordinate 3, y-coordinate 12

LESSON 9-2

axis

eje

One of the two number lines on a graph.

Example x-axis across, y-axis up

LESSON 9-2

plot

marcar

To mark a point on a graph.

Example right 3, up 12

LESSON 9-2

rate of change

tasa de cambio

How much y changes when x goes up by 1.

Example up $4 per hour

LESSON 9-2

unit rate

tasa unitaria

The amount of y for one unit of x.

Example 60 miles per hour

LESSON 9-2

origin

origen

The point (0, 0), where the two axes cross.

Example (0, 0)

LESSON 9-2

steeper

más empinada

A line that rises faster as you move right.

Example up 9 per hour beats up 2

LESSON 9-3

equation

ecuación

A math sentence with an equal sign.

Example y = 5x

LESSON 9-3

constant

constante

A number that never changes.

Example the 5 in y = 5x

LESSON 9-3

rate

tasa

The amount for each one unit.

Example $3 for each pound

LESSON 9-3

multiplicative rule

regla multiplicativa

Multiply the input by the same number.

Example y = 6x

LESSON 9-3

additive rule

regla aditiva

Add the same number to the input.

Example $y = x + 6$

LESSON 9-3

per

por

Means "for each one."

Example 25 miles per gallon

LESSON 9-4

substitute

sustituir

Put a known number in place of a letter.

Example put 8 in for x

LESSON 9-4

order of operations

orden de las operaciones

Multiply first, then add or subtract.

Example $3 \times 4 + 10 = 22$

LESSON 9-4

reasonable

razonable

Makes sense for the story.

Example 17 days, not 17 years

LESSON 9-4

work backward

trabajar hacia atrás

Start with the goal and undo the steps.

Example goal first, then divide

LESSON 9-4

inverse operation

operación inversa

An action that undoes another action.

Example ÷ undoes ×

LESSON 9-4

at least

al menos

That number or more.

Example at least 42 cars
