Unit 9 Vocabulary Retrieval Guide

Use the existing bilingual vocabulary cards with their diagrams. Study-card use: retrieve the meaning without looking, draw an example and nonexample, then explain which feature distinguishes them. Word-wall use needs a larger display size; do not claim the study-card print is readable across a room.

Lesson 9.1

Retrieve: independent variable, dependent variable, depends on, table of values, input, output.

Explain with the lesson model: The output ___ depends on ___ because the rule ___. Therefore ___.

Lesson 9.2

Retrieve: ordered pair, coordinates, axis, rate of change, unit rate, steeper.

Explain with the lesson model: The output ___ depends on ___ because the rule ___. Therefore ___.

Lesson 9.3

Retrieve: equation, constant, rate, unit rate, multiplicative rule, additive rule.

Explain with the lesson model: The output ___ depends on ___ because the rule ___. Therefore ___.

Lesson 9.4

Retrieve: substitute, equation, reasonable, work backward, inverse operation, goal.

Explain with the lesson model: The output ___ depends on ___ because the rule ___. Therefore ___.

Spanish terms are vocabulary access supports, not a complete Spanish edition. A proficient bilingual review is still required before claiming independently verified translation quality.
