LESSON 2-2 · HOMEWORK PACKET · SHEET 1 OF 2

Building a Histogram

Maryland Standard 6.SP.B.4 · Learning target – I can group data into equal intervals and build a histogram from a frequency table.

REMEMBER

- A **histogram** groups data into **equal intervals**, like 0–9, 10–19, 20–29.
- The **frequency** is how many values fall in an interval. It sets the bar height.
- Intervals do not overlap, and the bars **touch**.

WORKED EXAMPLE

Minutes of practice: 4, 15, 22, 9, 18, 27, 13, 16, 21, 11. Make a frequency table.

Step 1 0–9: 4, 9, so the frequency is 2.

Step 2 10–19: 15, 18, 13, 16, 11, so it is 5.

Step 3 20–29: 22, 27, 21, so it is 3.

Answer **2, 5, 3**

PRACTICE

show your work · label units

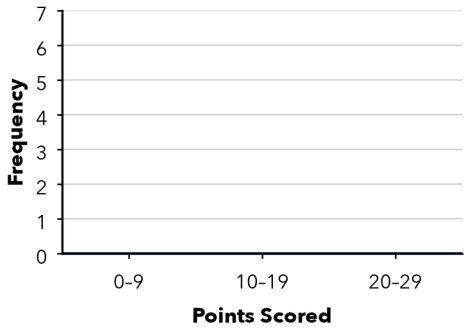

1. Points Scored. A player scored these points in 12 games: 8, 14, 21, 5, 17, 12, 25, 19, 11, 23, 16, 9. Complete the frequency table.

Points	Tally	Frequency
0–9		
10–19		
20–29		

2. Draw the histogram for Problem 1. Bars should touch.

a. Which interval has the tallest bar? _____

b. Games with 10 or more points: _____

3. Picnic Ages. 34, 22, 41, 38, 27, 45, 31, 36, 29, 48 years. Find each frequency.

a. 20–29: ____ **b.** 30–39: ____ **c.** 40–49: ____

4. Missing Bar. A histogram shows the long-jump distances of 24 students. Three bars have heights 5, 9, and 3. There is one more bar. How tall is it?

Answer_____ students

5. Find the Error. Marcus used the intervals 0–9, 10–14, and 15–29. Explain his mistake and fix it.

_____

_____

CHECK YOURSELF	☐ I can do this on my own	☐ I need a little help	☐ I have a question about #___

AT HOME Ask family members how many minutes they read today. Group the answers in intervals of 10.

LESSON 2-2 · HOMEWORK PACKET · SHEET 2 OF 2

Describing Histogram Shape

Maryland Standard 6.SP.B.4 · Learning target – I can describe the shape of a histogram using its peak, spread, and balance.

REMEMBER

- **Peak**: the tallest bar. **Symmetric**: sides match.
- **Skewed right**: the tail stretches right. **Skewed left**: the tail stretches left.
- A histogram shows counts, not exact values.

WORKED EXAMPLE

Bars of height 2, 7, 4, 2, 1 over 0–9, 10–19, 20–29, 30–39, 40–49. Shape?

Step 1 The peak is 10–19, near the left.

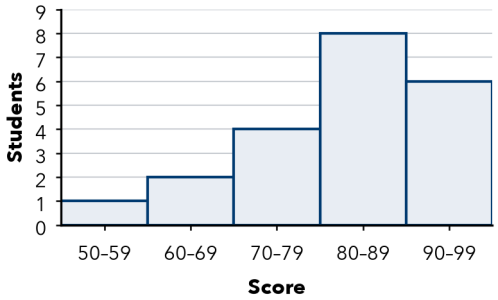

Step 2 The bars shrink to the right: a tail on the right.

Answer **Skewed right**

PRACTICE

show your work · label units

1. Test Scores. The histogram shows the scores on a class test.

a. Number of students: _____

b. Peak interval: _____

c. Shape: _____

d. Scores of 80 or more: _____

2. Bar heights are listed from left to right. Name each shape.

a. 1, 4, 8, 4, 1 _____ **b.** 9, 6, 3, 2, 1 _____ **c.** 1, 2, 3, 6, 10 _____

d. 3, 5, 9, 5, 3 _____ **e.** 12, 8, 5, 3, 2 _____ **f.** 2, 3, 5, 8, 12 _____

3. Race Times. Bars of 3, 8, 11, 6, 2 show 30 runners' times: 20–24, 25–29, 30–34, 35–39, 40–44 min.

a. How many runners finished in less than 30 minutes? _____

b. How many finished in 35 minutes or more? _____

4. Stretch. Write 5 bar heights, from left to right, for a histogram of **20** values that is **skewed left**.

Bar heights_____

5. Explain. Ramon says the Test Scores histogram shows a score of 85. Is he right? Explain.

_____

_____

TEST PRACTICE

choose the best answer

6. Bar heights are listed from left to right. Which histogram is skewed right?

A 2, 5, 9, 5, 2 **B** 10, 7, 4, 2, 1 **C** 1, 2, 4, 7, 10 **D** 5, 5, 5, 5, 5

7. Bars of height 4, 7, and 5 sit over 0–9, 10–19, and 20–29. How many values are 10 or more?

A 7 **B** 11 **C** 12 **D** 16
