Comparing Box Plots

1. Box J: Q1 = 15, Q3 = 27. Box K: Q1 = 18, Q3 = 24.

a. J width: ___ **b.** K width: ___ **c.** More consistent: ___

2. Medians: Class A 64, Class B 71. Which class is typically higher, and by how much?

Class; difference_____

3. Two plots have the same median, but Plot S has a much wider box. This means –

A S has a higher center **B** S is more spread out

C S has fewer values **D** S is more consistent
