Answer Key & Teacher Notes

Session 1 — Understanding Unit Rates · Session 2 — Comparing Unit Prices (Best Buy)

HOW TO USE THIS LESSON'S PAGES

one lesson = two sessions

Warm-Up	About 10 minutes; use items 1–4 for a 5-minute check. Key: Unit Warm-Up Key.
Prerequisite Practice A/B	Before the lesson, for students who need the skill the session uses. Key in that folder.
Guided Notes	During the lesson. Students fill in the blanks as you teach; answers below.
Practice Form A	In class, after the lesson. Two pages. The self-check code tells students if they are on track.
Practice Form B	Same skills, new numbers: reteach, retake, small group or absent students.
Exit Ticket	Last 5 minutes. Two per page; cut in half.
Homework Packet	Sheet 1 after Session 1, Sheet 2 after Session 2. Level 1 has the same problems and answers, with a word bank, step frames and larger type for students who need language support.

SESSION 1 · TEACHER NOTES

Understanding Unit Rates

TALK PROMPTS

- What is special about a unit rate? How does writing the rate per 1 unit help you compare amounts?
- How does knowing the miles for one hour let you predict five hours (Problem 2)?

PARTNER TASK

Printer Rate. In Problem 8, one partner finds pages per minute (288 ÷ 8 = 36); the other predicts pages in 15 minutes (540). Check by dividing back: 540 ÷ 15 = 36.

WATCH FOR

- Multiplying instead of dividing to find a unit rate (45 miles in 3 hours written as 135).
- Dividing in the wrong order, so the rate is for the wrong unit (7 ÷ 84 instead of 84 ÷ 7 for words per minute).
- Leaving off or mixing up the units in the answer.

SESSION 2 · TEACHER NOTES

Comparing Unit Prices (Best Buy)

TALK PROMPTS

- Why can't you just say $6.25 is cheaper than $35.00 without doing any math?
- Both packs in Problem 4 cost more than a dollar per notebook. Which pack's buyer pays less for each notebook, and how do you know?

PARTNER TASK

Granola Bars. In Problem 8, one partner finds Box X's price per bar ($0.75); the other finds Box Y's ($0.70). Decide which is the better buy and by how much ($0.05 per bar).

WATCH FOR

- Choosing the package with the lower total price instead of the lower unit price.
- Assuming the bigger package is always the better buy.
- Dividing the number of units by the price instead of the price by the number of units.

ITEM ANALYSIS

suggested DOK; judge the reasoning required, not the question label

Sheet	Standard	1	2	3	4	5	6	7	8	9	10	11
S1 · Form A	6.RP.A.2	1	2	1	1	2	2	2	2	2	1	1
S1 · Form B	6.RP.A.2	1	2	1	1	2	2	2	2	2	1	1
S2 · Form A	6.RP.A.2	1	2	2	2	2	2	2	2	2	1	1
S2 · Form B	6.RP.A.2	1	2	2	2	2	2	2	2	2	1	1

Items before the last three are Practice; then Find the Error (explain and correct) and two Test Practice items.

GUIDED NOTES

rate: A comparison of two amounts with **different** units.

unit rate: The amount for exactly **1** unit.

per: Means "for **each**" one.

constant rate: The amount stays the **same** every time.

- To find a unit rate, **divide** the first amount by the second.
- Multiply the unit rate by any number of units to **predict**.
- Always label the **units**: miles per hour, dollars per pound.

Example: Divide to find 1 minute: 90 ÷ 6 = **15** pages per minute. Multiply for 7 minutes: 15 × 7 = **105**. Check: 15 × 6 = **90**. Answer: **105** pages in 7 minutes

YOU TRY

1. a. 12 words per minute b. $7 per hour

2. 150 ÷ 3 = 50 mph; 50 × 5 = 250 miles

EXIT TICKET

1. a. 45 miles per hour b. $8 each

2. 315 ÷ 7 = 45 per minute; 45 × 20 = 900 bottles

3. **B** (60 miles per hour)

PRACTICE FORM A

1. a. 12 words per minute b. $7 per hour c. 27 miles per gallon d. 11 steps per second e. 16 beads each f. 23 lb per bed

2. a. 150 ÷ 2 = 75 miles per hour b. 75 × 5 = 375 miles

3. $45 ÷ 3 = $15 per lawn

4. $7.50 ÷ 6 = $1.25 per bottle

5. a. 240 ÷ 8 = 30 miles per gallon b. 360 ÷ 30 = 12 gallons

6. a. 12 ÷ 2 = 6 miles per hour b. 18 ÷ 6 = 3 hours

7. a. A: $54 ÷ 6 = $9 per hour; B: $85 ÷ 10 = $8.50 per hour b. Job A, by $0.50 per hour c. 14 × $8.50 = $119

8. a. 288 ÷ 8 = 36 pages per minute b. 36 × 15 = 540 pages

9. A unit rate needs division, not multiplication. 135 mph is impossible for a bike. 45 ÷ 3 = 15 miles per hour.

10. **B** (60 miles per hour)

11. **A** ($0.50 per apple)

Self-check word **DIVIDES**

PRACTICE FORM B

1. a. 13 words per minute b. $9 per hour c. 28 miles per gallon d. 12 steps per second e. 14 beads each f. 26 lb per bed

2. a. 195 ÷ 3 = 65 miles per hour b. 65 × 4 = 260 miles

3. $52 ÷ 4 = $13 per lawn

4. $9.00 ÷ 12 = $0.75 per bottle

5. a. 288 ÷ 9 = 32 miles per gallon b. 352 ÷ 32 = 11 gallons

6. a. 15 ÷ 3 = 5 miles per hour b. 20 ÷ 5 = 4 hours

7. a. A: $60 ÷ 8 = $7.50 per hour; B: $72 ÷ 9 = $8 per hour b. Job B, by $0.50 per hour c. 12 × $8 = $96

8. a. 312 ÷ 8 = 39 pages per minute b. 39 × 12 = 468 pages

9. A unit rate needs division, not multiplication. 96 mph is impossible for a runner. 24 ÷ 4 = 6 miles per hour.

10. **B** (70 miles per hour)

11. **C** ($0.40 per pen)

Self-check word **COMPARE**

GUIDED NOTES

unit price: The cost of exactly **one** item or unit.

better buy: The choice with the **lower** unit price.

total price: What the **whole** package costs.

- Unit price = total cost ÷ number of **units**.
- Find the unit price of **each** package, then compare.
- The **lower** unit price is the better buy.

Example: A: \$7.50 ÷ 5 = \$**1.50** per notebook. B: \$10.40 ÷ 8 = \$**1.30** per notebook. \$1.30 < \$1.50, so Store **B** is cheaper. Answer: Store B saves \$**0.20** per notebook.

YOU TRY

1. a. \$0.75 each b. \$0.25 each

2. \$2.40 ÷ 12 = \$0.20 per oz; \$3.60 ÷ 20 = \$0.18 per oz; the 20-oz bottle

EXIT TICKET

1. a. \$1.50 per lb b. \$0.50 each

2. A: \$0.70 per bar; B: \$0.65 per bar; Pack B

3. **B** (The price per ounce of each jar)

PRACTICE FORM A

1. a. \$0.75 each b. \$2.25 per yd c. \$0.25 each d. \$2.20 per lb e. \$0.15 per oz f. \$0.50 each

2. a. \$35.00 ÷ 7 = \$5 per day b. Option B c. \$6.25 − \$5.00 = \$1.25 per day

3. a. \$4.00 ÷ 16 = \$0.25 b. \$4.80 ÷ 24 = \$0.20 c. Brand B

4. Pack 1: \$1.50; Pack 2: \$1.40. Pack 2

5. Streamify \$9; TuneCloud \$8. The lower fee is \$8 per month (TuneCloud).

6. 3 pairs: \$3.50 each; 5 pairs: \$3.25 each; savings \$0.25 per pair

7. a. \$0.09 per oz and \$0.085 per oz b. 4 × \$2.88 = \$11.52; 2 × \$5.44 = \$10.88

8. a. \$6.00 ÷ 8 = \$0.75 b. \$8.40 ÷ 12 = \$0.70 c. Box Y

9. She compared total prices, not unit prices. 12 oz: \$0.20 per oz; 20 oz: \$0.18 per oz. The 20-oz bottle is the better buy.

10. **A** (\$0.60)

11. **B** (4 lb for \$9)

Self-check word **BARGAIN**

PRACTICE FORM B

1. a. \$0.70 each b. \$1.60 per yd c. \$0.30 each d. \$1.30 per lb e. \$0.25 per oz f. \$0.75 each

2. a. \$24.00 ÷ 5 = \$4.80 per day b. Option B c. \$5.50 − \$4.80 = \$0.70 per day

3. a. \$5.00 ÷ 20 = \$0.25 b. \$7.04 ÷ 32 = \$0.22 c. Brand B

4. Pack 1: \$1.25; Pack 2: \$1.35. Pack 1

5. Streamify \$7.50; TuneCloud \$6. The lower fee is \$6 per month (TuneCloud).

6. 4 pairs: \$3.25 each; 6 pairs: \$3.05 each; savings \$0.20 per pair

7. a. \$0.09 per oz and \$0.085 per oz b. 4 × \$2.16 = \$8.64; 2 × \$4.08 = \$8.16

8. a. \$6.50 ÷ 10 = \$0.65 b. \$9.30 ÷ 15 = \$0.62 c. Box Y

9. He compared total prices, not unit prices. 16 oz: \$0.20 per oz; 24 oz: \$0.17 per oz. The 24-oz bag is the better buy.

10. **A** (\$0.80)

11. **A** (5 lb for \$11)

Self-check word **SAVINGS**

SHEET 1 · UNDERSTANDING UNIT RATES

1. a. 45 mi per hour b. $8 per ticket c. 70 words per minute d. 12 apples per bag
2. 1 h: $12; 2 h: $24; 4 h: $48. Unit rate: $12 per hour (36 ÷ 3 = 12).
3. 156 ÷ 6 = 26 smoothies per hour; 26 × 9 = 234 smoothies in 9 hours
4. a. 12 ÷ 4 = 3 cups per loaf b. 4 ÷ 12 = 1/3 loaf per cup
5. Ben divided in the wrong order; 0.02 is minutes per word. Words per minute = 150 ÷ 3 = 50 words per minute.

SHEET 2 · COMPARING UNIT PRICES (BEST BUY)

1. a. $1.50 per lb b. $0.50 per box
2. Small: $3.60 ÷ 12 = $0.30 per oz; Large: $5.04 ÷ 18 = $0.28 per oz. The large box is the better buy.
3. a. $46 ÷ 2 = $23 per gallon b. $107.50 ÷ 5 = $21.50 per gallon c. $23 − $21.50 = $1.50 per gallon
4. a. A: $5.00 ÷ 4 = $1.25; B: $7.80 ÷ 6 = $1.30 b. Store A ($1.25 < $1.30)
5. No. 32-oz jar: $5.12 ÷ 32 = $0.16 per oz; 16-oz jar: $2.40 ÷ 16 = $0.15 per oz. The smaller jar is the better buy.
6. **B** (5 lb for $7.00)
7. **A** ($0.45)

October 2026 conceptual additions — teacher key

Session 1 · Understanding Unit Rates

14 pages/minute and 1/14 minute/page. Use 14 pages/minute: 5 × 14 = 70 pages. Reciprocal rates have different meanings and units.

Extension: To find the time needed for a given number of pages; for example, 28 pages × 1/14 minute/page = 2 minutes.

Scoring: 1 point for a valid representation/setup, 1 for accurate mathematics and units, 1 for an explanation connecting the method to the task. Accept equivalent reasoning and suitable oral or diagram responses. Do not infer mastery from confidence alone.

Session 2 · Comparing Unit Prices (Best Buy)

A: $1.55/notebook; B: $1.50/notebook. B is lower by $0.05 per notebook.

Extension: No. One A pack costs $9.30 and supplies 6; one B costs $12 and supplies 8. The buying constraint changes the decision.

Scoring: 1 point for a valid representation/setup, 1 for accurate mathematics and units, 1 for an explanation connecting the method to the task. Accept equivalent reasoning and suitable oral or diagram responses. Do not infer mastery from confidence alone.
