EXIT TICKET · LESSON 3-4 · SESSION 1 Name_____

Graphing Ratios on the Coordinate Plane

1. Each box holds 9 crayons (x = boxes, y = crayons). Write the ordered pair for:

a. 2 boxes _____ **b.** 4 boxes _____

2. Plot (1, 2), (2, 4) and (3, 6). Do they lie on one line through (0, 0)?

Yes or no_____

3. A ratio graph always passes through –

A (1, 1) **B** (0, 0) **C** (10, 10) **D** (0, 1)

Interpreting Points on Ratio Graphs

1. Find the unit rate point (1, r) for a line through:

a. (4, 28) _____ **b.** (6, 9) _____

2. A graph of tickets (x) and cost in dollars (y) passes through (2, 10). What does (2, 10) mean? What does one ticket cost?

_____

_____

3. On a ratio graph, the origin (0, 0) means –

A one of each quantity **B** none of either quantity

C the unit rate **D** the total amount
