Percent Means Per Hundred

Maryland Standard 6.AT.4 · Learning target – I can write a ratio as a percent by finding the equivalent ratio out of 100.

REMEMBER

- **Percent** means "per hundred." 37% = 37 out of 100.
- On a hundred grid, each square is **1%**.
- Make an **equivalent ratio** out of 100: multiply **both** terms by the same number.

WORKED EXAMPLE

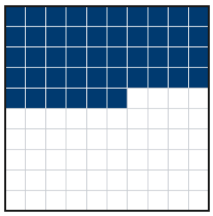

Out of every 20 students, 7 ride the bus. What percent of the students ride the bus?

Step 1 20 × 5 = 100, so multiply both terms by 5.
Step 2 7 × 5 = 35, so 7 out of 20 = 35 out of 100.
Step 3 35 out of 100 = 35%.
Answer **35%**
