Name_____ Date_____ Period_____

LESSON 4-2 · SESSION 1 · GUIDED NOTES

Fractions, Decimals, Percents

Learning target – I can write the same value as a fraction, a decimal, and a percent. · 6.AT.4

WORDS TO KNOW

fill in the missing words

WORD	WHAT IT MEANS	EXAMPLE
percent *por ciento*	A ratio that compares a number to ____.	45% = 45/100 = 0.45
equivalent *equivalente*	Names the _____ amount in a different way.	3/4 = 0.75 = 75%
hundredths *centésimas*	Parts out of 100; the _____ place after the point.	0.09 = 9 hundredths = 9%

KEY IDEA

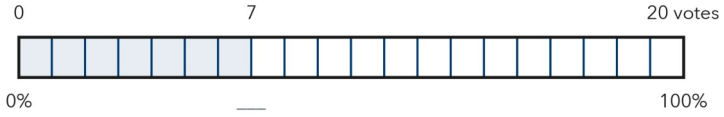

complete each sentence

- Fraction to percent: make an equivalent fraction with a denominator of ____.
- Decimal to percent: read the decimal in _____, so 0.4 = 0.40 = 40%.
- Percent to fraction: write the percent over 100, then _____.

WORKED EXAMPLE

fill in the blanks as we solve

20 students voted for a class color. 7 chose green. Write the green votes three ways.

Step 1 Fraction, part over whole: _____.

Step 2 20 × ___ = 100, so 7/20 = 35/100.

Step 3 35/100 = _____ as a decimal.

Answer **7/20 = 0.35 = ____**

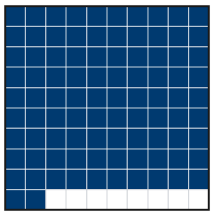

YOU TRY

use the example as a model

1. Write each value as a percent.

a. 3/5 = _____ **b.** 0.08 = _____ **c.** 0.7 = _____

2. A tank is 92% full, as the grid shows. Write 92% as a decimal and as a fraction in simplest form.

Decimal, fraction_____

SUM IT UP

in your own words

To write a fraction as a percent, I ___ because ___.

_____

_____

Name_____ Date_____ Period_____

LESSON 4-2 · SESSION 2 · GUIDED NOTES

Compare and Order

Learning target – I can compare and order values written as fractions, decimals, and percents. · 6.AT.4

WORDS TO KNOW

fill in the missing words

WORD	WHAT IT MEANS	EXAMPLE
common form *forma común*	Every value written the _____ way before you compare.	0.7, 3/5, 65% as 70%, 60%, 65%
benchmark *punto de referencia*	An easy number you know well, used to _____ other numbers.	1/2 = 50%
order *orden*	To list numbers from _____ to greatest, or greatest to least.	0.2, 35%, 1/2

KEY IDEA

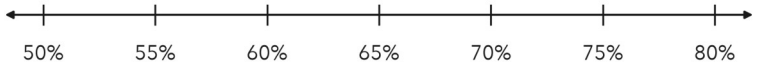

complete each sentence

- To compare a fraction, a decimal and a percent, first write them all as _____.
- After you order the percents, write the list with the _____ numbers.

WORKED EXAMPLE

fill in the blanks as we solve

Order 0.7, 3/5, and 65% from least to greatest.

Step 1 0.7 = 0.70 = ____

Step 2 3/5 = 60/100 = ____

Step 3 Compare: 60% < 65% < 70%

Answer **Least to greatest: ____, 65%, 0.7**

YOU TRY

use the example as a model

1. Write <, >, or = in each blank.

a. 0.3 ___ 1/4 **b.** 0.45 ___ 45% **c.** 7/20 ___ 0.4

2. Order 0.62, 3/5, and 61% from least to greatest.

Show your work.

Order_____

SUM IT UP

in your own words

To order a fraction, a decimal, and a percent, I first ___ because ___.

_____

_____

Name_____ Date_____ Period_____

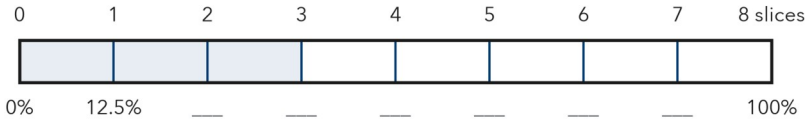

LESSON 4-2 · GUIDED NOTES · MODEL, REASON, EXPLAIN

Model It. Explain It.

SESSION 1 · FRACTIONS, DECIMALS, PERCENTS

draw it · solve it · explain it

A pizza is cut into 8 equal slices. Mia eats 3 slices. Fill in the percent row on the bar. Then write the part she ate as a fraction, a decimal, and a percent.

a. What percent is 1 slice? What percent are 3 slices?

b. Write 3/8 as a decimal.

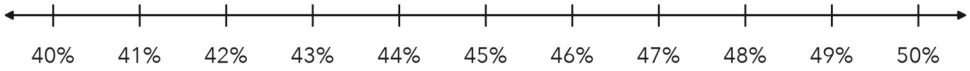

c. Explain how you know.

Challenge *Sam says 3/8 = 38% because you put the 3 and the 8 together. Use the bar to show why Sam is wrong.*

SESSION 2 · COMPARE AND ORDER

draw it · solve it · explain it

Class A recycled 0.45 of its bottles. Class B recycled 2/5. Class C recycled 48%. Mark each value on the number line. Then order the classes from least to greatest.

a. Write each value as a percent.

b. Order the classes from least to greatest.

c. Explain how you know.

Challenge *Leo says 2/5 is greater than 0.45 because 5 is greater than 4. Show why Leo is wrong.*

Check: Does my model match my numbers? Did I label units? Does my answer make sense?
